Microsoft

Exam Questions PL-900

Microsoft Power Platform Fundamentals

NEW QUESTION 1
You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	○	○
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
When you offer your application for use by other companies through a purchase or subscription, you make your application available to customers within their own Azure tenants. This is known as creating a
multi-tenant application.
Box 2: No

NEW QUESTION 2
You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement. You need to share the Power BI dashboard with coworkers.
What are three possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Create a Power BI workspace and grant coworkers permissions.
B. Publish the dashboard as an app to your coworkers.
C. Export the data into Common Data Service for others to manipulate in Power BI.
D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
E. Embed reports in your company's internal web portal.

Answer: ABE

Explanation:
A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the
Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.

Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.

Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

NEW QUESTION 3

A company manages a chain of retail stores. The company stores a list of retail store names and numbers in one Power BI table. The company stores sales transaction data including a transaction ID in another table.

The transaction ID includes the store number.

You need to show the store name for all retail transactions in all Power BI reports. Which tool should you use?

A. Query Editor
B. Power BI Service
C. Microsoft Excel
D. Data Connector

Answer: A

Explanation:

Power BI Desktop comes with Query Editor, where you can connect to one or many data sources, shape and transform the data to meet your needs, then load that model into Power BI Desktop.

NEW QUESTION 4

A company performs on-site inspections and services for air industrial equipment.

Field technicians must perform a series of maintenance checks every time they visit a customer site. Every technician performs maintenance tasks in a different order. Some technicians miss steps.

You need to ensure that all technicians perform the same steps in the same order. What should you use?

A. Business process flow
B. AI Builder
C. Business rule
D. Virtual Agent

Answer: A

Explanation:

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

NEW QUESTION 5
A toy company creates a text classification model in AI Builder to monitor customer feedback for specific key words.
When negative feedback is received for a toy, the company wants to proactively perform engineering reviews for the toy and schedule additional training sessions for workers who produce the toy.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Create a canvas app.
B. Implement the Virtual Agent.
C. Build a Microsoft Flow.
D. Use the Common Data Model.

Answer: AC

Explanation:
A (not D): AI Builder comes with:
A ready-to-use business card reader available in canvas as well as in model-driven apps. Business card reader (Canvas)
Business card reader (Model-driven)
Additional canvas components to leverage your AI Builder form processing or object detection models canvas apps.
C: Use the results from your AI model across Power Platform to create end-to-end solutions that meet your business needs, even if you have no coding skills. For example, create a flow that automates document processing in Power Automate, or an app created with PowerApps that predicts whether a supplier will be out of compliance.

NEW QUESTION 6
You need to explain the major components of the Common Data Model (CDM) and their functions. Match each term to its definition.
Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.
NOTE: Each correct selection is worth one point.

Tools

| Entities |
| Data connectors |
| Common Data Service |
| Common Data Model |
| Microsoft Power Platform |
| Workflows |

Answer Area

Purpose	Tool
Helps jumpstart application development by leveraging business logic, security, and integrations.	Tool
A set of records used to store data.	Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Microsoft Power Platform
Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform – providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.
The Microsoft Power platform brings all your data together into a common data model. Box 2: Entities
An entity is a set of records used to store data, similar to how a table stores data within a database.

NEW QUESTION 7
A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.
The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.
You need to recommend a tool to determine software usage. What should you recommend?

A. Microsoft Intune
B. Azure Stream Analytics
C. Power Platform Analytics
D. Dynamics 365 Product Insights

Answer: C

Explanation:
The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users

across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.

NEW QUESTION 8
A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.
You need to recommend a solution for the coworker. What should you recommend?

A. Create a custom connector.
B. Ask the outside source to send you the data once a week.
C. Use Microsoft Flow to connect to the database.
D. Open a ticket with Microsoft and request a new connector.
E. Use Microsoft Azure Service Bus.

Answer: A

Explanation:
There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.
Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

NEW QUESTION 9
A bank uses Power Platform apps and flows to support business processes.
The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.
You need to use AI Builder to implement the solution.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Publish the model.

Export data into AI Builder.

Train the model.

Import data into Common Data Service.

Use the model in PowerApps or Microsoft Flow.

Answer area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Import data into Common Data Service.
AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.
Step 2: Train the model Step 3: Publish the model
The last step is to publish your model.
Step 4: Use the model in PowerApps or Microsoft Flow.

NEW QUESTION 10
You manage the support team at a rapidly growing company.
Customers and support technicians need a better experience when logging and responding to support requests. You need more visibility into what the support technicians are doing every week.
You need to recommend tools to help the company's needs.
Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Tools

| Power Apps |
| Microsoft Flow |
| Power BI |
| Common Data Service |

Answer Area

Requirement	Tool
Customers must be able to submit support requests by using a website.	Tool
Support requests must be created and stored.	Tool
Support technicians must be notified when a new support request is entered.	Tool
Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Tools

| Power Apps |
| Microsoft Flow |
| Power BI |
| Common Data Service |

Answer Area

Requirement	Tool
Customers must be able to submit support requests by using a website.	Power BI
Support requests must be created and stored.	Common Data Service
Support technicians must be notified when a new support request is entered.	Microsoft Flow
Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	Power Apps

NEW QUESTION 10
You are new to working with Microsoft Flow. You create a flow that extracts birth dates for users and then sends a birthday greeting email to users on their birthday.
The flow does not properly extract birth dates. Where should you make changes?

A. Connectors
B. Expression
C. Templates

Answer: A

Explanation:
Select the new Date Time connector. There you will see all of the actions, which help you to convert time zones to format them for local time in an email, add or subtract times, or just get the current time.

NEW QUESTION 14
A company uses Power Apps.
You need to perform administrative tasks for the company.
Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Admin centers

Azure Active Directory

Dynamics 365 Admin center

Power Apps Admin center

Power BI Admin portal

Answer Area

Requirement	Admin center
Create user accounts for Power Apps.	Admin center
Assign the Environment Maker role to a user.	Admin center

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Azure Active Directory
Create the company users in the Azure Active Directory. Box 2: Power Apps admin center
In the Power Apps Admin center, manage environments that you've created and those for which you have been added to the Environment Admin or System Administrator role. From the admin center, you can perform these administrative actions:
Create environments. Rename environments.
Add or remove a user or group from either the Environment Admin or Environment Maker role. Etc.

NEW QUESTION 15
A company is using Power BI to build visualizations.
The company's IT support team needs to know when to install Power BI Desktop on users' computers and where the Power BI Service will suffice to perform tasks.
You need to recommend solutions for the company.
What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Tools

Power BI Service only

Power BI Desktop only

Power BI Desktop or Power BI Service

Answer Area

| Requirement	Component
Create dashboards.	Tool
Create reports.	Tool
Create calculated columns.	Tool
Configure security.	Tool
Configure sharing.	Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:
In a Venn diagram comparing Power BI Desktop and the Power BI service, the area in the middle shows how the two overlap. Some tasks you can do in either Power BI Desktop or the service. The two sides of the Venn diagram show the features that are unique to the application and the service.

Power BI Desktop
Many data sources
Transforming
Shaping & modeling
Measures
Calculated columns
Python
Themes
RLS creation

Both
Reports
Visualizations
Security
Filters
Bookmarks
Q&A
R visuals

Power BI service
Some data sources
Dashboards
Apps & workspaces
Sharing
Dataflow creation
Paginated reports
RLS management
Gateway connections
