

Microsoft

Exam Questions MD-101

Managing Modern Desktops (beta)

NEW QUESTION 1

- (Exam Topic 2)

You need to meet the requirements for the MKG department users. What should you do?

- A. Assign the MKG department users the Purchaser role in Microsoft Store for Business
- B. Download the APPX file for App1 from Microsoft Store for Business
- C. Add App1 to the private store
- D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business
- E. Acquire App1 from Microsoft Store for Business

Answer: E

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

NEW QUESTION 2

- (Exam Topic 2)

You are evaluating which devices are compliant.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 3

- (Exam Topic 2)

To which devices do Policy1 and Policy2 apply? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Policy1:

Device1 only
Device2 only
Device3 only
Device4 only
Device2 and Device3 only
Device1 and Device3 only
Device1, Device2, and Device 3

Policy2:

Device1 only
Device2 only
Device3 only
Device4 only
Device2 and Device3 only
Device1 and Device3 only
Device1, Device2, and Device 3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/device-profile-assign>

NEW QUESTION 4

- (Exam Topic 2)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Specify ComputerName as:

"HR" + RAND(4)
"HumanResources-" + RAND(????)
HR-%RAND:4%
HR-????
HumanResources-%RAND:4%

Specify AccountOU as:

CN=Computers, CN=HR, DC=Contoso, DC=com
Computers/HumanResources/Contoso.com
Contoso.com/HR/Computers
OU=Computers, OU=HR, DC=Contoso, DC=com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

NEW QUESTION 5

- (Exam Topic 3)

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Devke2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer Area

Device1:

1
2

Device2:

3
4
5

Device2:

1
2
3
4
5

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, table Description automatically generated

NEW QUESTION 6

- (Exam Topic 4)

You have computers that run Windows 10 as shown in the following table.

Name	Configuration
Computer1	Active Directory domain-joined
Computer2	Microsoft Azure Active Directory (Azure AD) –joined
Computer3	Hybrid Microsoft Azure Active Directory (Azure AD)-joined

Computer2 and Computer3 are enrolled in Microsoft Intune.

In a Group Policy object (GPO) linked to the domain, you enable the Computer Configuration/Administrative Templates/Windows Components/Search/Allow Cortana setting.

In an Intune device configuration profile, you configure the following:

- Device/Vendor/MSFT/Policy/Config/ControlPolicyConflict/MDMWinsOverGP to a value of 1
- Experience/AllowCortana to a value of 0.

Each of the following statement, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Computer1 can use Cortana for each.	<input type="radio"/>	<input type="radio"/>
Computer2 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>
Computer3 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://blogs.technet.microsoft.com/cbernier/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who>

NEW QUESTION 7

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

You rename file \\Server1\\Profiles\\User1.V6\\NTUSER.DAT as NTUSER.MAN.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated
A mandatory user profile is a roaming user profile that has been pre-configured by an administrator to specify settings for users. Settings commonly defined in a mandatory profile include (but are not limited to): icons that appear on the desktop, desktop backgrounds, user preferences in Control Panel, printer selections, and more. Configuration changes made during a user's session that are normally saved to a roaming user profile are not saved when a mandatory user profile is assigned.
The .man extension causes the user profile to be a read-only profile. Reference:
<https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

NEW QUESTION 8

- (Exam Topic 4)
Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD). There are 500 domain-joined computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune. You plan to implement Windows Defender Exploit Guard. You need to create a custom Windows Defender Exploit Guard policy, and then distribute the policy to all the computers. What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

Security & Compliance in Microsoft 365

Windows Configuration Designer

Windows Defender Security Center

Distribution method:

An Azure policy

A Group Policy object (GPO)

An Intune device compliance policy

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/enable-ex>

NEW QUESTION 9

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- > MDM user scope: Group1
- > MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

NEW QUESTION 10

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM) You need to deploy the Microsoft Office 365 ProPlus suite to all the computers. What should you do?

- A. From Microsoft Azure Active Directory (Azure AD), add an app registration.
 B. From the Device Management admin center, add an app.
 C. From the Device Management admin center, create a Windows 10 device profile.
 D. From Microsoft Azure Active Directory (Azure AD), add an enterprise application

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/mdm/enterprise-app-management#application-ma>

NEW QUESTION 10

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.
You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

App Information Edit

Name	Microsoft 365 Apps for Windows 10
Description	Microsoft 365 Apps for Windows 10
Publisher	Microsoft
Category	Productivity
Show this as a featured app in the Company Portal	No
Information URL	https://products.office.com/en-us/explore-office-for-home
Privacy URL	https://privacy.microsoft.com/en-US/privacystatement
Developer	Microsoft
Owner	Microsoft
Notes	...
Logo	
Architecture	Teams, Word
Update channel	64-bit
Remove other versions	Current Channel
Version to install	Yes
Use shared computer activation	Latest
Accept the Microsoft Software License	No
Teams on behalf of users	No
Install background service for Microsoft	No
Search in Bing	No
Apps to be installed as part of the suite	1 language(s) selected

Assignments Edit

Group mode	Group
<input checked="" type="checkbox"/> Required	
<input type="checkbox"/> Included	Group1
Available for enrolled devices	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
LT1 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT2 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT3 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 13
- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 16

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:

- > Ensure that any applications installed by the users are retained.
- > Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Deployment ToolKit (MDT)
- B. Windows Deployment Services (WDS)
- C. a Windows Configuration Designer provisioning package
- D. Windows AutoPilot

Answer: C

Explanation:

You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.

NEW QUESTION 17

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	Android Enterprise
Device4	iOS
Device5	iPadOS

You need to deploy a compliance solution that meets the following requirements:

- > Marks the devices as Not Compliant if they do not meet compliance policies
- > Remotely locks noncompliant devices

What is the minimum number of compliance policies required, and which devices support the remote lock action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Minimum number of compliance policies required:

Devices that support the remote lock action:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started> <https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

NEW QUESTION 22

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is a member of Group1. User1 does not have any permission to Image1. Box 2: Yes

User1 has read permissions to Image2 through Group1. Box 3: Yes

User2 has read permissions to Image3 through Group2.

NEW QUESTION 23

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 10 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro

Microsoft Defender Application Guard is installed on the computers.

Application Guard Group Policy settings are applied to the computers as shown in the following table.

Setting	State
Turn on Windows Defender Application Guard in Managed Mode	Enabled
Configure Windows Defender Application Guard clipboard settings	Enabled
Allow files to download and save to the host operating system from Windows Defender Application Guard	Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Computer1 can use Application Guard in Enterprise-managed mode.	<input type="radio"/>	<input type="radio"/>
Computer2 can copy clipboard settings from Microsoft Edge to Application Guard.	<input type="radio"/>	<input type="radio"/>
Computer3 can download files from Application Guard to the host operating system.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-application-guard/configure-application-guard>

NEW QUESTION 24

- (Exam Topic 4)

HOTSPOT

Your company uses Microsoft System Center Configuration Manager (Current Branch) and purchases 365 subscription.

You need to set up Desktop Analytics for Configuration Manager.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Set up the Desktop Analytics cloud service by using:

The Configuration Manager console
The Microsoft 365 admin center
The Microsoft Endpoint Manager admin center

From the Configuration Manager console, select:

Add Microsoft Intune Subscription
Configure Azure Services
Configure co-management
Create Cloud Management Gateway

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/connect-configmgr>

NEW QUESTION 26

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 10. You need to modify the deployment share to meet the following requirements:

> Define a rule for how to name computers during the deployment.

The solution must NOT replace the existing WinPE image.

Which file should you modify for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Administrator password:

Bootstrap.ini
CustomSettings.in
Settings.ini
System.ini

Computer names:

Bootstrap.ini
CustomSettings.in
Settings.ini
System.ini

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using>

NEW QUESTION 30

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1.

Solution: You create a scope tag, and then you add the scope tag to the Windows 10 Enterprise devices. You edit the settings of Profile1.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

NEW QUESTION 31

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.

Solution: You configure roaming user profiles. Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/deploy-roaming-user-profiles>

NEW QUESTION 33

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need to deploy Microsoft Office 365 ProPlus applications to Windows 10 devices. What should you do first?

A. From Microsoft Azure Active Directory (Azure AD), create an app registration.

B. From the Device Management admin center, create an app.

C. From the Device Management admin center, create an app configuration policy.

D. From the Device Management admin center, enable Microsoft Store for Business synchronization

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>

NEW QUESTION 38

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Mail-enabled security group
Group4	Security group

In the Microsoft Endpoint Manager admin center, you are creating a Microsoft 365 Apps app named App1. To which objects can you assign App1?

- A. Admin1, Group3. and Group4 only
- B. Group1, Group2. Group3. and Group4 only
- C. Admin1, Group1, Group2. Group3, and Group4
- D. Group1, Group3, and Group4 only
- E. Group3 and Group4 only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy>

<https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

NEW QUESTION 39

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot self-deploying deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

NEW QUESTION 41

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From File Explorer, you go to C:\Folder1, and then you double-click the Package1.ppkg file.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 44

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All Windows 10 devices are enrolled in Microsoft Intune.

You configure the following settings in Windows Information Protection (WIP):

- > Protected apps: App1
- > Exempt apps: App2
- > Windows Information Protection mode: Silent App1, App2, and App3 use the same file format. You create a file named File1 in App1.

You need to identify which apps can open File1.

What apps should you identify? To answer, select the appropriate options in the answer area, NOTE: Each correct selection is worth one point.

You can open File1 from:

<input type="checkbox"/> App1 only
<input type="checkbox"/> App1, and App2 only
<input type="checkbox"/> App1 and App3 only
<input type="checkbox"/> App1, App2, and App3

An action will be logged when you attempt to open File1 from:

<input type="checkbox"/> App1 only
<input type="checkbox"/> App3 only
<input type="checkbox"/> App1, and App2 only
<input type="checkbox"/> App2 and App3 only
<input type="checkbox"/> App1, App2, and App3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/creating-apps> <https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/creating-apps>

NEW QUESTION 45

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a group named Group1.

You create a Conditional Access policy named CAPolicy1 and assign CAPolicy1 to Group1.

You need to configure CAPolicy1 to require the members of Group1 to reauthenticate every eight hours when they connect to Microsoft Exchange Online.

What should you configure?

- A. Session access controls
- B. an assignment that uses a User risk condition
- C. an assignment that uses a Sign-in risk condition
- D. Grant access controls

Answer: A

Explanation:

User sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource.

The Azure Active Directory (Azure AD) default configuration for user sign-in frequency is a rolling window of 90 days.

Sign-in frequency control

- Sign in to the Azure portal as a global administrator, security administrator, or Conditional Access administrator.
- Browse to Azure Active Directory > Security > Conditional Access.
- Select New policy.
- Give your policy a name. We recommend that organizations create a meaningful standard for the names of their policies.
- Choose all required conditions for customer's environment, including the target cloud apps.
- Under Access controls > Session.

Select Sign-in frequency.

Choose Periodic reauthentication and enter a value of hours or days or select Every time.

- Save your policy. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-session-life>

NEW QUESTION 50

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to set a custom image as the wallpaper and sign-in screen.

Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 55

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window.

Solution: In Group policy, from the Maintenance Scheduler settings, you configure Automatic Maintenance Activation Boundary.

Does this meet the goal?

- A. Yes
 B. No

Answer: A

Explanation:
<https://learn.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

NEW QUESTION 57

- (Exam Topic 4)
You have a Microsoft 365 E5 subscription and 150 Windows 10 devices. All the devices are enrolled in Microsoft Intune. You need to use Intune to apply Windows updates to the devices. What should you do first?

- A. From the Microsoft Endpoint Manager admin center, configure scope tags.
- B. Create a device restriction policy that has telemetry set to the minimum setting of Required
- C. From the Microsoft Endpoint Manager admin center, configure a security baseline.
- D. Create a device restriction policy that has telemetry set to Security (Enterprise Only).

Answer: A

NEW QUESTION 60

- (Exam Topic 4)
Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). You have a Microsoft Office 365 subscription. All computers are joined to the domain and have the latest Microsoft OneDrive sync client (OneDrive.exe) installed. On all the computers, you configure the OneDrive settings as shown in the following exhibit.

Setting	State
Allow syncing OneDrive accounts for only specific organizations	Enabled
Configure team site libraries to sync automatically	Not configured
Set the maximum percentage of upload bandwidth that OneDrive.exe uses	Not configured
Prevent users from moving their Windows known folders to OneDrive	Not configured
Block syncing OneDrive accounts for specific organizations	Not configured
Migrate Pre-existing TeamSites with OneDrive Files On-Demand	Not configured
The maximum size of a user's OneDrive for Business before they will be prompted to ch...	Not configured
Enable OneDrive Files On-Demand	Not configured
Prevent users from redirecting their Windows known folders to their PC	Disabled
Silently move Windows known folders to OneDrive	Enabled
Prompt users to move Windows known folders to OneDrive	Not configured
Prevent OneDrive from generating network traffic until the user signs in to OneDrive	Not configured
Prevent users from using the remote file fetch feature to access files on the computer	Enabled
SharePoint on-premises server URL and tenant folder name	Not configured
SharePoint prioritization setting for hybrid customers that use SharePoint Online (SPO)...	Not configured
Silently configure OneDrive using the primary Windows account	Enabled

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

[answer choice] will sync automatically by using OneDrive

No folders

The Documents folder

The Favontes folder

To reduce the disk space used by a user profile, you must [answer choice].

configure team site libraries to sync automatically

enable OneDrive Files On-Demand

set the maximum percentage of upload bandwidth used by OneDrive.exe

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1:
Silently move known folders to OneDrive is enabled. Known folder include: Desktop, Documents, Pictures, Screenshots, and Camera Roll
Box 2:
OneDrive Files On-Demand enables users to view, search for, and interact with files stored in OneDrive from within File Explorer without downloading them and taking up space on the local hard drive.
References:
<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders> <https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise>

NEW QUESTION 64

- (Exam Topic 4)
You have an Azure Active Directory (Azure AD) tenant named contoso.com. You create a terms of use (ToU) named Terms1 in contoso.com. You are creating a conditional access policy named Policy1 to assign a cloud app named App1 to the users in contoso.com. You need to configure Policy1 to require the users to accept Terms1. What should you configure in Policy1?

- A. Grant in the Access controls section
- B. Conditions in the Assignments section
- C. Cloud apps or actions in the Assignments section
- D. Session in the Access controls section

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/require-tou>

NEW QUESTION 65

- (Exam Topic 4)

Your company has a Microsoft 365 tenant.

Users sign in to Windows 10 devices by using their Microsoft 365 account.

On a computer, you open Sync your settings as shown in the exhibit. (Click the Exhibit tab.)

- A. Enable User Experience Virtualization (UE-V).
- B. Enable Windows Mobility Center.
- C. Disable Windows Hello for Business.
- D. Enable Enterprise State Roaming.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-enable>

NEW QUESTION 68

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference: <https://docs.microsoft.com/en-us/windows/deployment/windows-deployment-scenarios-and-tools>

NEW QUESTION 72

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com The tenant contains Windows 10 devices that are enrolled in Microsoft Intune.

You create an Azure Log Analytics workspace and add the Device Health solution to the workspace.

You need to create a custom device configuration profile that will enroll the Windows 10 devices in Device Health.

Which OMA-URI should you add to the profile?

- A. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push
- B. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push/ChannelURI
- C. ./Vendor/MSFT/DMClient/Provider/MS DM Server/CommercialID
- D. ./Vendor/MSFT/DMClient/Provider/MS DM Server/ManagementServerAddressList

Answer: C

Explanation:

References:

<https://allthingscloud.blog/monitor-windows-10-updates-for-intune-mdm-enrolled-devices/>

NEW QUESTION 77

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
- B. Device2 only

- C. Device1 and Device2 only
- D. Device1 only
- E. Device1, Device2, and Device3

Answer: E

Explanation:

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS

macOS

Windows Holographic for Business

Windows 8.1 and later Windows 10/11

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/supported-devices-browsers> <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 78

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 10 and are joined to the domain.

The domain is synced to Microsoft Azure Active Directory (Azure AD).

You create an Azure Log Analytics workspace and deploy the Device Health solution. You need to enroll the computers in Windows Analytics.

Which Group Policy setting should you configure?

- A. Specify intranet Microsoft update service location
- B. Allow Telemetry
- C. Configure the Commercial ID
- D. Connected User Experiences and Telemetry

Answer: C

Explanation:

Microsoft uses a unique commercial ID to map information from user computers to your Azure workspace. Copy your commercial ID key from any of the Windows Analytics solutions you have added to your Windows Portal, and then deploy it to user computers.

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-get-started>

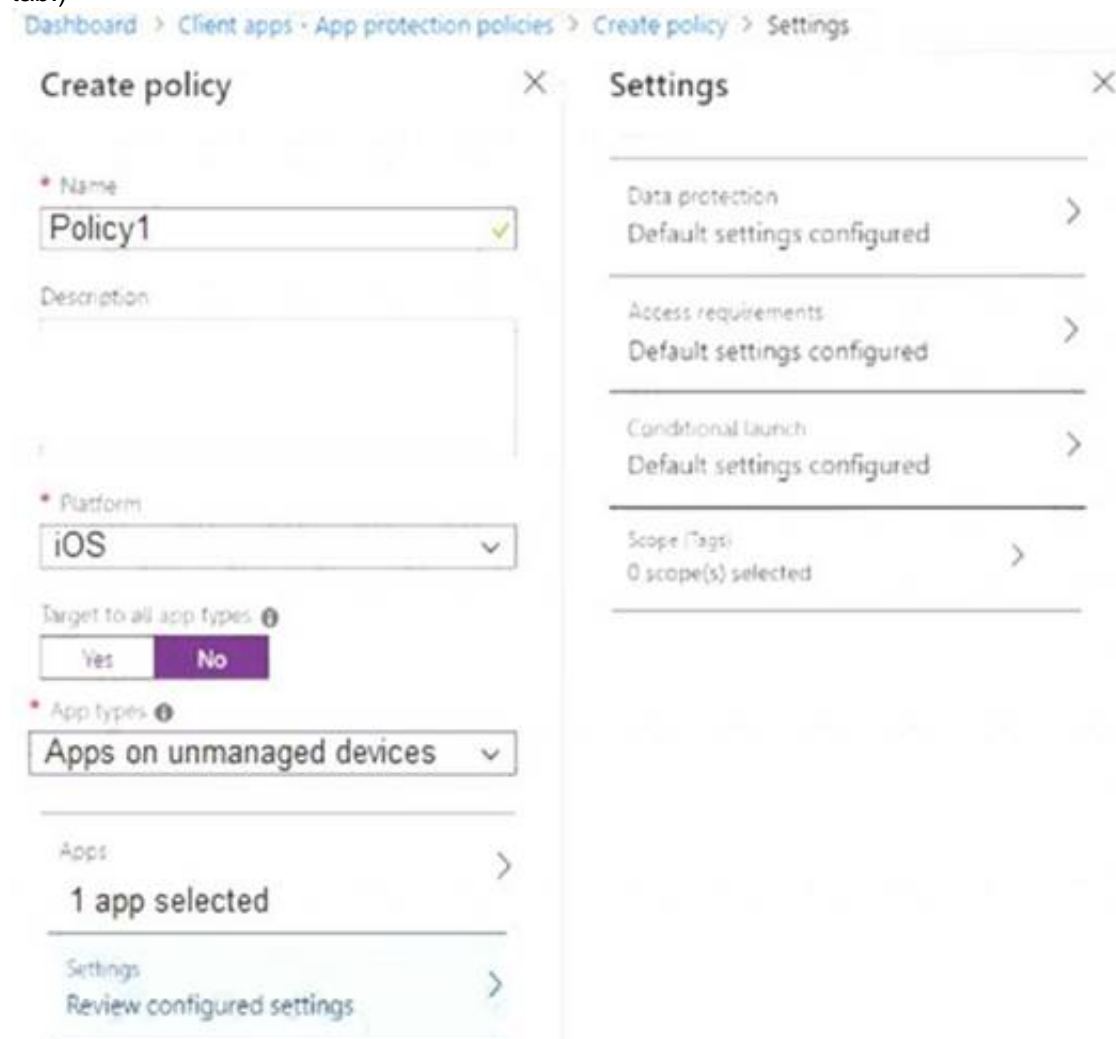

NEW QUESTION 79

- (Exam Topic 4)

You have a Microsoft 365 subscription.

Users have iOS devices that are not enrolled in Microsoft 365 Device Management.

You create an app protection policy for the Microsoft Outlook app as shown in the exhibit. (Click the Exhibit tab.)

Dashboard > Client apps > App protection policies > Create policy > Settings

Create policy

* Name
 Policy1 ✓

Description

* Platform
 iOS

Target to all app types ⓘ
 Yes No

* App types ⓘ
 Apps on unmanaged devices

Apps
 1 app selected

Settings
 Review configured settings

Settings

Data protection
 Default settings configured

Access requirements
 Default settings configured

Conditional launch
 Default settings configured

Scope (Tags)
 0 scope(s) selected

You need to configure the policy to meet the following requirements:

- > Prevent the users from using the Outlook app if the operating system version is less than 12.0.0.
- > Require the users to use an alphanumeric passcode to access the Outlook app.

What should you configure in an app protection policy for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Prevent the users from using Outlook if the operating system version is less than 12.0.0:

	▼
Access requirements	
Conditional launch	
Data protection	
Scope	

Require the users to use an alphanumeric passcode to access Outlook:

	▼
Access requirements	
Conditional launch	
Data protection	
Scope	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

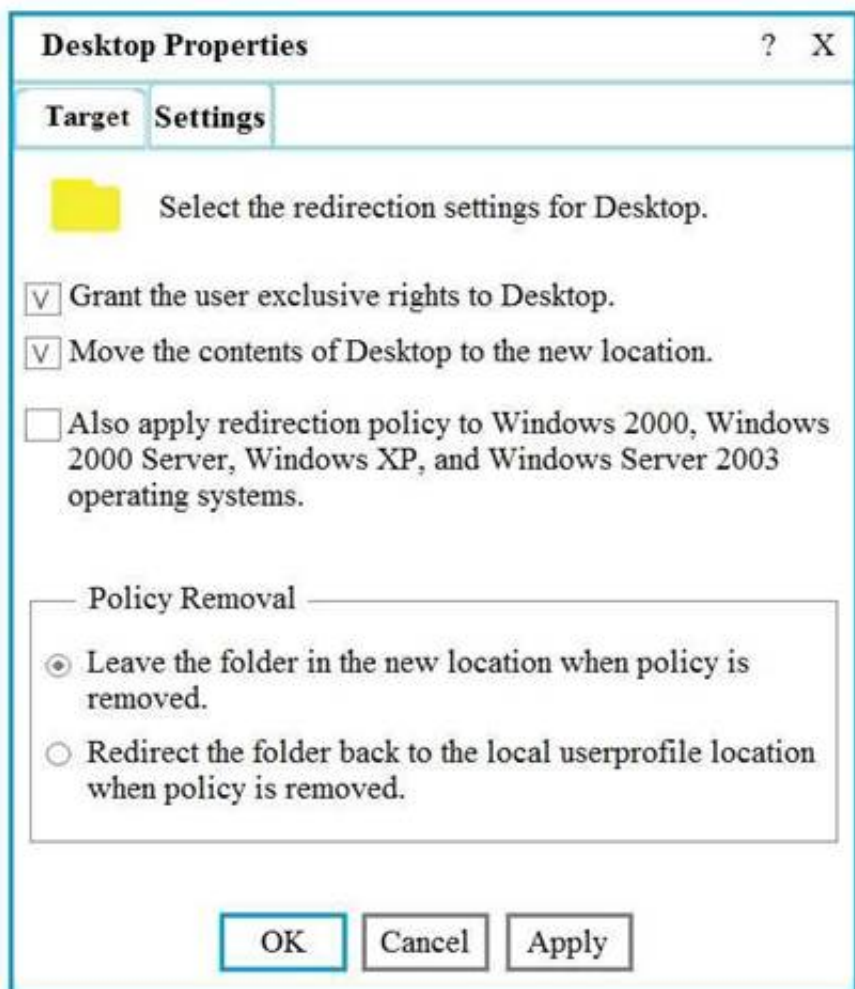

References:

<https://docs.microsoft.com/en-us/intune/app-protection-policy-settings-ios>

NEW QUESTION 84

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10. Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

Desktop Properties ? X

Target **Settings**

Select the redirection settings for Desktop.

☒ Grant the user exclusive rights to Desktop.

☒ Move the contents of Desktop to the new location.

☐ Also apply redirection policy to Windows 2000, Windows 2000 Server, Windows XP, and Windows Server 2003 operating systems.

Policy Removal

☒ Leave the folder in the new location when policy is removed.

☐ Redirect the folder back to the local userprofile location when policy is removed.

OK Cancel Apply

The target is set to Server1.

You plan to use known folder redirection in Microsoft OneDrive for Business.

You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Clear the Grant the user exclusive rights to Desktop check box.
- B. Change the Policy Removal setting.
- C. Disable Folder Redirection.
- D. Clear the Move the contents of Desktop to the new location check box.

Answer: BC

Explanation:

The OneDrive Known Folder Move Group Policy objects won't work if you previously used Windows Folder Redirection Group Policy objects to redirect the Documents, Pictures, or Desktop folders to a location other than OneDrive. Remove the Windows Group Policy objects for these folders before you enable the OneDrive Group Policy objects. The OneDrive Group Policy objects won't affect the Music and Videos folders, so you can keep them redirected with the Windows Group Policy objects. For info about Windows Folder Redirection, see [Deploy Folder Redirection with Offline Files](#).

NEW QUESTION 86

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.
 You need to identify which computers can be upgraded to Windows 10.
 Solution: From the Microsoft Endpoint Manager admin center, you create a device compliance policy and assign the policy to the computers. After 24 hours, you view the Device compliance report in Intune.
 Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 89

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.
 You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	None
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device2 and Device3 only
- B. Device3 only
- C. Device2 only
- D. Device 1, Device2, and Device3

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

NEW QUESTION 94

- (Exam Topic 4)

You have a Microsoft 365 subscription.
 You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD)
 You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.
 You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computer.
 What should you use?

- A. Roaming user profiles
- B. Folder Redirection
- C. The Microsoft SharePoint Migration Tool
- D. Enterprise State Roaming

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-faqs>

NEW QUESTION 98

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.
 You plan to create a Conditional Access policy to block users that have a high sign-in risk level.
 You need to identify the required license, and what to use to identify the sign-in risk level. The solution must minimize costs.
 To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

License:

<input type="checkbox"/>	Azure Active Directory Premium Plan 1
<input type="checkbox"/>	Azure Active Directory Premium Plan 2
<input type="checkbox"/>	Microsoft Office 365 E3

Use:

<input type="checkbox"/>	Azure AD Identity Protection
<input type="checkbox"/>	Security defaults
<input type="checkbox"/>	Verifiable credentials

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Azure AD Premium Plan 2

You will need an Azure AD Premium P1 license to get access to the Microsoft Office 365 conditional access policy feature.

However, need Azure AD Premium Plan 2 to sign-in risk. Box 2: Azure AD Identity Protection

A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner. Organizations with Azure AD Premium P2 licenses can create Conditional Access policies incorporating Azure AD Identity Protection sign-in risk detections.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-risk>

<https://blog.mydock365.com/what-is-conditional-access-in-microsoft-365>

NEW QUESTION 102

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com.

You create a provisioning package named Package1 as shown in the following exhibit.

Steps

Set up device

Set up network

Account management

Add applications

Add certificates

Add certificates

Protect your package

Protect the content of your package by specifying a password.
The password length must be 8-16 characters.

☐

No

What is the maximum number of devices on which you can run Package1 successfully?

- A. 1
- B. 10
- C. 25
- D. unlimited

Answer: D

NEW QUESTION 106

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

Answer: D

Explanation:

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

NEW QUESTION 108

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics.

You need to create baseline metrics. What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.

D. Modify the Baseline regression threshold.

Answer: B

Explanation:

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 110

- (Exam Topic 4)

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com

What should you do?

- A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- B. Create a provisioning package (.ppkg) file and email the file to the user
- C. Create a Windows To Go workspace and ship the workspace to the user
- D. Create a Sysprep Unattend (.xml) file and email the file to the user

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 115

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	iOS

You plan to enroll the devices in Microsoft Intune.

How often will the compliance policy check-ins run after each device is enrolled in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Device2:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Every three minutes for 15 minutes, then every 15 minutes for two hours, and then around every eight hours

If devices recently enroll, then the compliance, non-compliance, and configuration check-in runs more frequently. The check-ins are estimated at:

Windows 10: Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Graphical user interface, text, application, email Description automatically generated

Platform	Frequency
iOS/iPadOS	Every 15 minutes for 1 hour, and then around every 8 hours
macOS	Every 15 minutes for 1 hour, and then around every 8 hours
Android	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 10/11 PCs enrolled as devices	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 8.1	Every 5 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Box 2: Every 15 minutes for one hour, and then every eight hours
 iOS/iPadOS: Every 15 minutes for 1 hour, and then around every 8 hours
 Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

NEW QUESTION 119

- (Exam Topic 4)

You have the 64-bit computers shown in the following table.

Name	Operating system	Memory	BitLocker Drive Encryption (BitLocker)
Computer1	32-bit version of Windows 7 Service Pack 1 (SP1)	1 GB	Enabled
Computer2	64-bit version of Windows 7 Service Pack 1 (SP1)	4 GB	Enabled
Computer3	32-bit version of Windows 8.1	2 GB	Enabled
Computer4	64-bit version of Windows 8.1	4 GB	Disabled

You plan to perform an in-place upgrade to the 64-bit version of Windows 10.
 Which computers can you upgrade to the 64-bit version of Windows 10 in their current state?

- A. Computer2 and Computer4 only
- B. Computer4 only
- C. Computer3 and Computer4 only
- D. Computer1, Computer2, Computer3 and Computer4
- E. Computer2, Computer3, and Computer4 only

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios>

NEW QUESTION 120

- (Exam Topic 4)

You have a Microsoft 365 tenant

You have devices enrolled in Microsoft Intune.

You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Endpoint Manager admin center, review the Setting compliance report.
- B. From the Microsoft Endpoint Manager admin center, review the Noncompliant devices reporter.
- C. From the Microsoft Endpoint Manager admin center, review Device compliance report.
- D. From the Azure Active Directory admin center, review the Conditional Access Insights and Reporting workbook.

Answer: B

Explanation:

The Noncompliant devices report provides data typically used by Helpdesk or admin roles to identify problems and help remediate issues. The data found in this report is timely, calls out unexpected behavior, and is meant to be actionable.

Note: Compliance reports help you understand when devices fail to meet your compliance configurations and can help you identify compliance-related issues in your organization.

Open the compliance dashboard

Open the Intune Device compliance dashboard:

➤ Sign in to the Microsoft Endpoint Manager admin center.

➤ Select Devices > Overview > Compliance status tab.

When the dashboard opens, you get an overview with all the compliance reports. In these reports, you can see and check for:

Overall device compliance Per-policy device compliance Per-setting device compliance Threat agent status

Device protection status View compliance reports

In addition to using the charts on Compliance status, you can go to Reports > Device compliance.

➤ Sign in to the Microsoft Endpoint Manager admin center.

➤ Select Devices > Monitor, and then from below Compliance select the report you want to view. Some of the available compliance reports include:

Device compliance Noncompliant devices

Devices without compliance policy Setting compliance

Policy compliance Noncompliant policies (preview)

Windows health attestation report Threat agent status

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-monitor>

NEW QUESTION 123

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

The Active Directory domain contains 200 computers that run Windows 10. The computers are managed by using Microsoft System Center Configuration Manager (Current Branch).

You need to pilot co-management for only five of the computers.

What should you create first?

A. a domain local distribution group in Active Directory

B. an Intune Connector for Active Directory

C. a device collection in Configuration Manager

D. a dynamic device group in Azure AD

Answer: C

Explanation:

The Pilot Intune setting switches the associated workload only for the devices in the pilot collection.

Note: When you enable co-management, you'll assign a collection as a Pilot group. This is a group that contains a small number of clients to test your co-management configurations. We recommend you create a suitable collection before you start the procedure. Then you can select that collection without exiting the procedure to do so.

References:

<https://docs.microsoft.com/en-us/configmgr/comanage/tutorial-co-manage-new-devices>

NEW QUESTION 126

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to ensure that users can only enroll devices that meet the following requirements:

➤ Android devices that support the use of work profiles.

➤ iOS devices that run iOS 11.0 or later.

Which two restrictions should you modify? To answer, select the restrictions in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Home > Devices > Enroll devices > All Users >

Edit restriction

Device type restriction

1 Platform settings 2 Review + save

Specify the platform configuration restrictions that must be met for a device to enroll. Use compliance policies to restrict devices after enrollment. Define versions as major.minor.build. Version restrictions only apply to devices enrolled with the Company Portal. Intune classifies devices as personally-owned by default. Additional action is required to classify devices as corporate-owned. [Learn more.](#)

Type	Platform	versions	Personally owned	Device manufacturer
Android Enterprise (work profile)	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Manufacturer name here
Android device administrator	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Manufacturer name here
iOS/iPadOS	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported
macOS	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported

Cancel

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Android device administrator, Platform: Block Restrict devices running on the following platforms: Android device administrator
Android Enterprise work profile iOS/iPadOS
macOS Windows

Note: If you allow both Android platforms for the same group, devices that support work profile will enroll with a work profile. Devices that don't support it will enroll on the Android device administrator platform. Neither work profile nor device administrator enrollment will work until you complete all prerequisites for Android enrollment.

Box 2: iOS/PadOS, Allow min/max Range: Min

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 131

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

- Compliance policy trends
- Trends in device and user enrolment
- App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Data source:	<div><div></div><div>Audit logs in Azure Active Directory (Azure AD)</div><div>Audit logs in Microsoft Intune</div><div>Azure Synapse Analytics</div><div>The Microsoft Intune Data Warehouse</div></div>
Data visualization tool:	<div><div></div><div>Azure Data Studio</div><div>Microsoft Power BI</div><div>The Azure portal</div></div>

NEW QUESTION 137
- (Exam Topic 4)
You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 10 deployment tasks. MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 10 in-place upgrade on several computers that run Windows 8.1. From the Deployment Workbench, you open the New Task Sequence Wizard.
You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.
What should you identify? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 141

- (Exam Topic 4)

You have an Azure Active Directory group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2.

You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Policy1?

- A. Assignments
- B. Applicability Rules
- C. Settings
- D. Scope (Tags)

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign>

NEW QUESTION 143

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains two computers named Computer1 and Computer2. The computers run Windows 10 and are members of a group named GroupA.

The tenant contains a user named User1 that is a member of a group named Group1.

You need to ensure that if User1 changes the desktop background on Computer1, the new desktop background will appear when User1 signs in to Computer2. What should you do?

- A. Create a device configuration profile for Windows 10 and configure the Shared multi-user device setting
- B. Assign the profile to GroupA.
- C. From the Azure Active Directory admin center, enable Enterprise State Roaming for Group1.
- D. From the Azure Active Directory admin center, enable Enterprise State Roaming for GroupA.
- E. Create a device configuration profile for Windows 10 and configure the Shared multi-user device setting
- F. Assign the profile to Group1.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/shared-user-device-settings-windows> <https://docs.microsoft.com/en-us/mem/intune/configuration/shared-user-device-settings-windows> <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign>

NEW QUESTION 146

- (Exam Topic 4)

Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share.

User1 signs in to Computer1 and performs the following tasks:

- > Configures screen saver to start after five minutes of inactivity
- > Modifies the default save location for Microsoft Word
- >

Creates a file named File1.docx on the desktop

➤ Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2. What should you identify?

- A. File1.docx and the desktop background only
- B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
- C. File1.docx only
- D. File1.docx, the desktop background, and the default save location for Word only

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/folder-redirection-rup-overview>

NEW QUESTION 150

- (Exam Topic 4)

You are licensed for Microsoft Endpoint Manager.

You use Microsoft Endpoint Configuration Manager and Microsoft Intune.

You have devices enrolled in Configuration Manager as shown in the following table.

Name	Collection
Device1	Collection1
Device2	Collection2
Device3	Collection1, Collection2

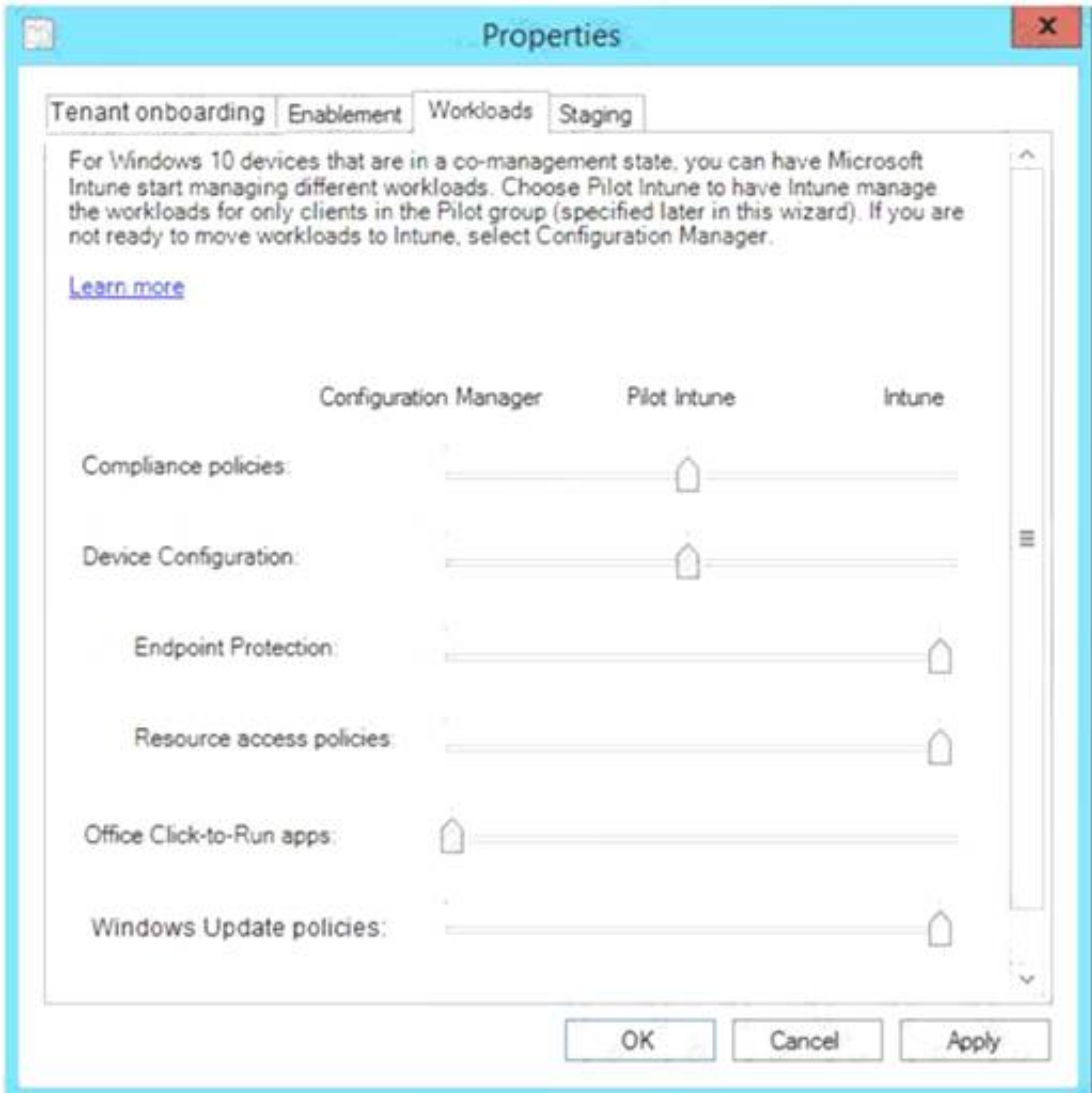

In Configuration Manager, you enable co-management and configure the following settings:

- Automatic enrolment in Intune: Pilot
- Intune Auto Enrollment: Collection1

In Configuration Manager, you configure co-management staging to have the following settings:

- Compliance policies: Collection2
- Device Configuration: Collection1

In Configuration Manager, you configure co-management workloads as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device1.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device2.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/configmgr/comanage/workloads>

NEW QUESTION 153

- (Exam Topic 4)
You have unrooted devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.
In Intune, you create a device compliance location that has the following configurations:

- > Name: Network1
- > IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has following configurations:

- > Name: Policy1
- > Device health: Rooted devices: Block
- > Locations: Location: Network1
- > Mark device noncompliant: Immediately
- > Assigned: Group1

In Intune device compliance policy has the following configurations:

- > Mark devices with no compliance policy assigned as: Compliant
- > Enhanced jailbreak detection: Enabled
- > Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/intune/device-compliance-get-started>

NEW QUESTION 156

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.

Solution: You configure Enterprise State Roaming. Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settingsrefere>

NEW QUESTION 157

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the Windows 10 devices shown in the following table.

Name	Used by	Azure Active Directory (Azure AD) join type	Managed by using Microsoft Intune
Device1	User1	Joined	Yes
Device2	User1	Registered	Yes
Device3	User1	Joined	No

You enable Enterprise State Roaming

You need to ensure that User1 can sync Windows settings across the devices. What should you do?

A. Join Device2 to Azure AD.

B. Add a Microsoft account to each device.

C. Remove Device1 and Device2 from Intune.

D. Enroll Device3 in intune.

Answer: D

NEW QUESTION 160

- (Exam Topic 4)

You have Windows 10 devices that are managed by using Microsoft Intune. Intune and the Microsoft Store for Business are integrated.

You need to deploy the Remote Desktop modern app as an automatic install to the Windows 10 devices without user interaction.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Create an Azure Active Directory group that contains all users.

B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.

C. From the Intune portal assign the app to the Azure Active Directory group.

D. Create an Azure Active Directory group that contains the Windows 10 devices.

E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.

F. For your organization, make the app available in the Microsoft Store for Business.

Answer: BCD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

NEW QUESTION 164

- (Exam Topic 4)

You have a Microsoft 365 Business Standard subscription and 100 Windows 10 Pro devices. You purchase a Microsoft 365 E5 subscription.

You need to upgrade the Windows 10 Pro devices to Windows 10 Enterprise. The solution must minimize administrative effort.

Which upgrade method should you use?

A. Subscription Activation

B. an in-place upgrade by using Windows installation media

C. a Microsoft Deployment Toolkit (MDT) lite-touch deployment

D. Windows Autopilot

Answer: A

Explanation:

Windows 10/11 Subscription Activation

Windows 10 Pro supports the Subscription Activation feature, enabling users to “step-up” from Windows 10 Pro or Windows 11 Pro to Windows 10 Enterprise or Windows 11 Enterprise, respectively, if they are subscribed to Windows 10/11 Enterprise E3 or E5.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 165

- (Exam Topic 4)

You have a Microsoft 365 tenant and an internal certification authority (CA).

You need to use Microsoft Intune to deploy the root CA certificate to managed devices.

Which type of Intune policy and profile should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Policy type:

App configuration policy
App protection policy
Compliance policy
Configuration profile

Profile:

Imported public key pair (PKCS) certificate
Public key pair (PKCS) certificate
Simple Certificate Enrollment Protocol (SCEP) certificate
Trusted certificate

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Configuration profile Create a trusted certificate profile. Box 2: Trusted certificate

When using Intune to provision devices with certificates to access your corporate resources and network, use a trusted certificate profile to deploy the trusted root certificate to those devices. Trusted root certificates establish a trust from the device to your root or intermediate (issuing) CA from which the other certificates are issued.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-trusted-root>

NEW QUESTION 168

- (Exam Topic 4)

You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant.

You configure a Windows Autopilot deployment profile as shown in the following exhibit.

Create profile

Windows Autopilot deployment profiles

* Name

AutoPilot1

Description

Optional

By default, this profile can only be applied to Autopilot devices synced from the Autopilot service. [Learn More](#).

Convert all targeted devices to Autopilot.

Yes

No

* Deployment mode

User-Driven

* Join to Azure AD as

Azure AD joined

Out-of-box experience (OOBE)

Defaults configured

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

To apply the profile to a new computer, you must first

- join the device to Azure AD
- enroll the device in Microsoft Intune
- import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

- joined to Azure AD only
- registered in Azure AD only
- joined to Active Directory only
- joined to Active Directory and registered in Azure AD

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 173

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system
Device1	Windows 10
Device2	Android 8.0
Device3	Android 9
Device4	iOS 11.0
Device5	iOS 11.4.1

All devices contain an app named App1 and are enrolled in Microsoft Intune.

You need to prevent users from copying data from App1 and pasting the data into other apps.

Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Policy type:

	▼
App configuration policy	
App protection policy	
Conditional access policy	
Device compliance policy	

Minimum number of policies:

	▼
1	
2	
3	
4	
5	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies> <https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies-configure-windows-10>

NEW QUESTION 176

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You redirect Windows known folders to Microsoft OneDrive for Business. Which folder will be included in the redirection?

- A. Saved Games
- B. Documents
- C. Music
- D. Downloads

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

NEW QUESTION 179

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to C:\Folder1, and then you run the RegSvr32.exe Package1.ppkg command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 181

- (Exam Topic 4)

You have five computers that runs Windows 10.

You need to create a provisioning package to configure the computers to meet the following requirements: ➤ Run an interactive app.

- Automatically sign in by using a local user account.
- Prevent users from accessing the desktop and running other applications.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Apply the provisioning package.
- Run the Provision desktop devices project.
- Copy the provisioning package to each computer.
- Run the Provision kiosk devices project.
- Install the Microsoft Deployment Toolkit (MDT).
- Enable Microsoft User Experience Virtualization (UE-V).
- Install the Windows Configuration Designer.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 182

- (Exam Topic 4)
You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company. You have a computer named Computer1 than runs Windows 10. You need to view the events collected from Computer1. Which query should you run in Log Analytics?

- A. Event| where Computer == "Computer1"
B. ETWEvent| where SourceSystem == "Computer1"
C. ETWEvent| where Computer == "Computer1"
D. Event| where SourceSystem == "Computer1"

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events>

NEW QUESTION 186

- (Exam Topic 4)
You have a Microsoft 365 E5 subscription that contains a user named User1 and the devices shown in the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device 1 and Device2. You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- * Assignments
- * Users or workload identities: User1
- * Cloud apps or actions: Office 365 Exchange Online
- * Access controls
- * Grant: Block access

You need to configure CAPolicy1 to allow mailbox access from Device 1 but block mailbox access from Device2. Solution: You add a condition that specifies a trusted locations. Does this meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

Instead use solution: You add a condition to filter for devices. Note: Conditional Access: Filter for devices
When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.
Reference:
<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 191

- (Exam Topic 4)

You use Microsoft Intune to manage client computers. The computers run one of the following operating systems:

- Windows 8.1
- Windows 10 Pro
- Windows 10 Enterprise
- Windows 10 Enterprise LTSC

You plan to manage Windows updates on the computers by using update rings. Which operating systems support update rings?

- A. Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC only
- B. Windows 8.1, Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC
- C. Windows 10 Enterprise and Windows 10 Enterprise LTSC only
- D. Windows 10 Pro and Windows 10 Enterprise only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

NEW QUESTION 193

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 8.1 and use local user profiles.

You deploy 10 new computers that run Windows 10 and join the computers to the domain.

You need to migrate the user profiles from the Windows 8.1 computers to the Windows 10 computers. What should you do?

- A. From the Windows 8.1 computer of each user, run imagex.exe/capture, and then from the Windows 10 computer of each user, run imagex.exe/apply.
- B. Configure roaming user profiles for the user
- C. Instruct the users to first sign in to and out of their Windows 8.1 computer and then to sign in to their Windows 10 computer.
- D. From the Windows 8.1 computer of each user, run scanstate.exe, and then from the Windows 10 computer of each user, run loadstate.exe.
- E. Configure Folder Redirection for the user
- F. Instruct the users to first sign in to and out of their Windows 8.1 computer, and then to sign in to their Windows 10 computer.

Answer: C

Explanation:

The ScanState command is used with the User State Migration Tool (USMT) 10.0 to scan the source computer, collect the files and settings, and create a store.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax> <https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-loadstate-syntax>

NEW QUESTION 197

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1. You need to perform the following tasks for User1:

- Set the Usage location to Canada.
- Configure the Phone and Email authentication contact info for self-service password reset (SSPR). Which two settings should you configure in the Azure Active Directory admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

 Profile
 Custom security attributes (Preview)
 Assigned roles
 Administrative units
 Groups
 Applications
 Licenses
 Devices
 Azure role assignments
 Authentication methods

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 202

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices. You need to create Intune configuration profiles to perform the following actions on the devices:

- Deploy a custom Start layout.
- Rename the local Administrator account.

Which profile template should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Deploy a custom Start layout:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Rename the local Administrator account:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Device restriction

Customize Start Menu Custom & Taskbar

Here is a quick step-by-step guide to help you to deploy the prepared XML file. This Intune policy helps to customize the start menu and taskbar for Windows 10 devices.

Logon to Microsoft Endpoint Manager Portal.

Navigate to Devices -> Windows -> Configuration Profiles. Select Platform -> Windows 10 and later.

Select Profile Type -> Template.

Search with "device" and select Device Restrictions. Click on Create button.

Box 2: Identity protection

Use an Identity protection profile to manage Windows Hello for Business on groups of devices in Microsoft Intune. Windows Hello for Business is a method for signing in to Windows devices by replacing passwords, smart cards, and virtual smart cards. Intune includes built-in settings so Administrators can configure and use Windows Hello for Business.

Reference:

<https://www.anoopcnaire.com/start-menu-taskbar-custom-layout-intune-cloudpc/> <https://docs.microsoft.com/en-us/mem/intune/protect/identity-protection-configure>

NEW QUESTION 205

- (Exam Topic 4)

Your company has an infrastructure that has the following:

- A Microsoft 365 tenant
- An Active Directory forest
- Microsoft Store for Business
- A Key Management Service (KMS) server
- A Windows Deployment Services (WDS) server
- A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

Azure Active Directory admin center
Microsoft Store for Business
Volume Activation Management Tool console
Windows Deployment Services console

Required information from each computer:

Device serial number and hardware hash
MAC address and computer name
Volume License Key and computer name

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 210

- (Exam Topic 4)

You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant, a Microsoft System Center Configuration Manager (Current Branch) environment, and a Microsoft 365 subscription.

You have computers that run Windows 10 as shown in the following table.

Name	Managed by Configuration Manager	Domain membership
Computer1	Yes	Active Directory-joined
Computer2	Yes	Hybrid Azure AD-joined
Computer3	Yes	Azure AD-joined

You plan to use Microsoft 365 Device Management.

Which computers support co-management by Configuration Manager and Device Management?

- A. Computer1, Computer2, and Computer3
 B. Computer3 only
 C. Computer1 and Computer2 only
 D. Computer2 only

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/overview>

NEW QUESTION 213

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

A user named User1 uses the domain-joined devices shown in the following table.

Name	Operating system
Device1	Windows 8.1 Pro
Device2	Windows 10 Pro

In the Azure Active Directory admin center, you assign a Windows 10 Enterprise E5 license to User1. You need to identify what will occur when User1 next signs in to the devices.

What should you identify for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

Will activate as Windows 10 Enterprise

Will not upgrade to Windows 10 Enterprise

Will perform a clean installation of Windows 10 Enterprise

Will perform an in-place upgrade to Windows 10 Enterprise

Device2:

Will activate as Windows 10 Enterprise

Will not upgrade to Windows 10 Enterprise

Will perform a clean installation of Windows 10 Enterprise

Will perform an in-place upgrade to Windows 10 Enterprise

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 215

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and the devices shown in the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device1 and Device2.

You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- Assignments
- Users or workload identities: User1
- Cloud apps or actions: Office 365 Exchange Online
- Access controls
- Grant Block access

You need to configure CAPolicy1 to allow mailbox access from Device1 but block mailbox access from Device2.

Solution: You add a condition to filter for devices. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Conditional Access: Filter for devices

When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 217

- (Exam Topic 4)

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Role
User1	Global admin
User2	Application admin
User3	None
User4	None

You provision the private store in Microsoft Store for Business and assign Microsoft Store for Business roles to the users as shown in the following table.

Name	Role
User2	Admin
User3	Purchaser
User4	Basic Purchaser

You configure the following Shopping behavior settings for the Microsoft Store for Business:

- > Allow users to shop: Yes

- > Make everyone a Basic Purchaser: Off
- > Allow app requests: On
- > Shop offline apps: Off

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can assign the Microsoft Store for Business Admin role to User4.	<input type="radio"/>	<input type="radio"/>
When User4 requests an app from the Microsoft Store for Business, User2 will be notified.	<input type="radio"/>	<input type="radio"/>
User3 can assign apps from the Microsoft Store for Business to User2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

NEW QUESTION 219

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You need to create a Conditional Access policy to ensure that when a user accesses the Microsoft 365 portal, the user will be prompted to sign in again after seven days.

What should you configure to specify the sign-in frequency?

- A. Session access controls
- B. an assignment that uses the Cloud apps or actions settings
- C. Grant access controls
- D. an assignment condition

Answer: A

Explanation:

Conditional Access: Session

Within a Conditional Access policy, an administrator can make use of session controls to enable limited experiences within specific cloud applications.

Sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource. Administrators can select a period of time (hours or days) or choose to require reauthentication every time.

Sign-in frequency setting works with apps that have implemented OAUTH2 or OIDC protocols according to the standards. Most Microsoft native apps for Windows, Mac, and Mobile including the following web applications follow the setting.

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-conditional-access-session>

NEW QUESTION 223

- (Exam Topic 4)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

Answer: D

Explanation:

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

Devices Enrollment

App protection policy Compliance policy

Device configuration profiles Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

- > Sign in to the Microsoft Endpoint Manager admin center.
- > Select Reports > Intune Data warehouse > Data warehouse.

- Retrieve the custom feed URL from the reporting blade, for example:
- Open Power BI Desktop.
- Choose File > Get Data. Select OData feed.
- Choose Basic.
- Type or paste the OData URL into the URL box.
- Select OK.
- If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
- Select Organizational account.
- Type your username and password.
- Select Sign In.
- Select Connect.
- Select Load.

NEW QUESTION 228

- (Exam Topic 4)

You are replacing 100 company-owned Windows devices.

You need to use the Microsoft Deployment Toolkit (MDT) to securely wipe and decommission the devices.

The solution must meet the following requirements:

- Back up the user state.
- Minimize administrative effort.

Which task sequence template should you use?

- A. Litetouch OEM Task Sequence
- B. Sysprep and Capture
- C. Standard Client Replace Task Sequence
- D. Standard Client Task Sequence

Answer: C

Explanation:

NEW QUESTION 233

- (Exam Topic 4)

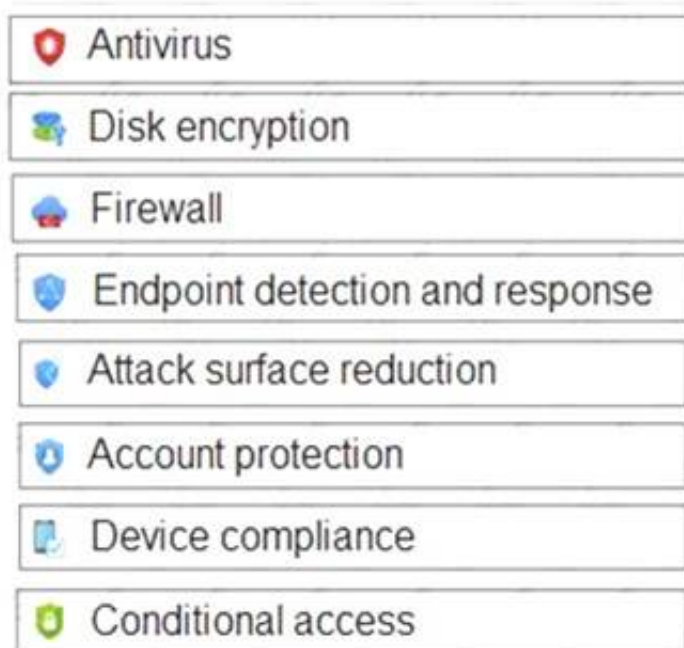

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You need to create Endpoint security policies to meet the following requirements:

- Hide the Firewall & network protection area in the Windows Security app.
- Disable the provisioning of Windows Hello for Business on the devices.

Which two policy types should you use? To answer, select the policies in the answer area.

NOTE: Each correct selection is worth one point.

Manage

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

In the Antivirus policy settings, you can hide the Firewall and network protection area in the Windows Security app.

Windows Hello for Business settings are configured in Identity protection. Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/antivirus-security-experience-windows-settings> <https://docs.microsoft.com/en-us/mem/intune/protect/identity-protection-windows-settings>

NEW QUESTION 238

- (Exam Topic 4)

You use Microsoft Defender for Endpoint to protect computers that run Windows 10.

You need to assess the differences between the configuration of Microsoft Defender for Endpoint and the Microsoft-recommended configuration baseline.

Which tool should you use?

- A. Microsoft Defender Security Center
- B. Desktop Analytics
- C. Microsoft Defender for Endpoint Power BI app
- D. Microsoft Secure Score

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender/microsoft-secure-score?view=o365-worldwid>

NEW QUESTION 243

- (Exam Topic 4)

Your network contains an Active Directory domain. The functional level of the forest and the domain is Windows Server 2012 R2.

The domain contains 500 computers that run Windows 10. All the computers are managed by using Microsoft System Center 2012 R2 Configuration Manager.

You need to enable co-management. What should you do first?

- A. Deploy the Microsoft Intune client.
- B. Raise the forest functional level.
- C. Upgrade Configuration Manager to Current Branch.
- D. Raise the domain functional level.

Answer: C

NEW QUESTION 246

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 10.

You create a new task sequence by using the Standard Client Task Sequence template to deploy Windows 10 Enterprise to new computers. The computers have a single hard disk.

You need to modify the task sequence to create a system volume and a data volume. Which phase should you modify in the task sequence?

- A. Preinstall
- B. State Restore
- C. Initialization
- D. Postinstall

Answer: A

Explanation:

Reference:

<https://www.prajwaldesai.com/create-extra-partition-in-mdt/>

NEW QUESTION 250

- (Exam Topic 4)

You have computers that run Windows 10 Pro. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to upgrade the computers to Windows 10 Enterprise. What should you configure in Intune?

- A. A device enrollment policy
- B. A device cleanup rule
- C. A device compliance policy
- D. A device configuration profile

Answer: D

Explanation:

Reference:

<https://blogs.technet.microsoft.com/skypehybridguy/2018/09/21/intune-upgrade-windows-from-pro-toenterprise>

NEW QUESTION 253

- (Exam Topic 4)

Your company plans to deploy tablets to 50 meeting rooms.

The tablets run Windows 10 and are managed by using Microsoft Intune. The tablets have an application named App1.

You need to configure the tablets so that any user can use App1 without having to sign in. Users must be prevented from using other applications on the tablets.

Which device configuration profile type should you use?

- A. Kiosk
- B. Endpoint protection
- C. Identity protection
- D. Device restrictions

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/kiosk-single-app>
