

## Exam Questions PL-100

Microsoft Power Platform App Maker

<https://www.2passeasy.com/dumps/PL-100/>

NEW QUESTION 1

- (Topic 4)  
You design a canvas app for users to search thousands of records. You select a data source that supports delegation to optimize performance. You need to create the app so that it takes advantage of the delegable functionality of the data source. What should you do?

- A. Run multiple processes simultaneously.
- B. Use the query functions the data source provides.
- C. Use the data returned from the data source in multiple languages.
- D. Connect to the same data source as different users at run time.

Answer: B

NEW QUESTION 2

- (Topic 4)  
You create a Power Platform solution. Solution data is stored in a variety of documented cloud services. You must also be able to connect to one or more industry data sources. You need to configure the data sources. What should you do?

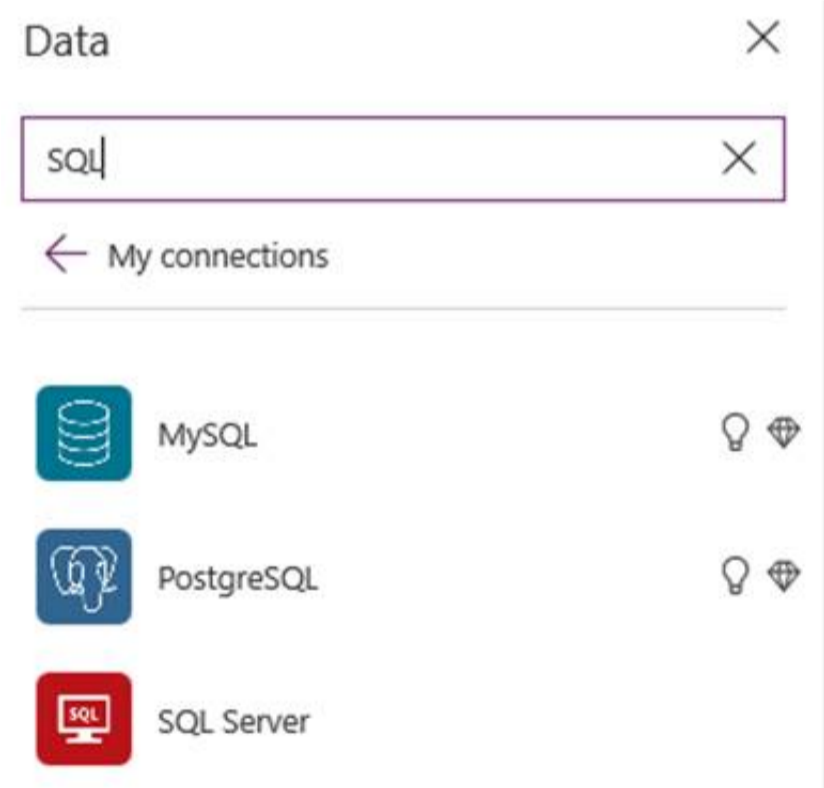

- A. Create a business process flow.
- B. Create a data policy template.
- C. Create a UI flow.
- D. Use an existing data connector.

Answer: D

Explanation:

In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch. Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.

- Note:
- Add data source
- \* 1. In the center pane, select connect to data to open the Data pane.
  - \* 2. Select Add data source.
  - \* 3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.
  - \* 4. Select New connection to display a list of connections.
  - \* 5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.

- \* 6. Select Create to both create the connection and add it to your app.
- Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection>

NEW QUESTION 3

DRAG DROP - (Topic 4)  
You have a basic user security role in a test environment. You create a canvas app without customization in the environment. You need to send the app to production administrators for production deployment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add the app to the solution.

Export the solution.

Send the solution to production administrators.

Select the canvas app in the Maker portal.

Export the package.

Send the package to production administrators.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Add the app to the solution.

Export the solution.

Send the solution to production administrators.

Select the canvas app in the Maker portal.

Export the package.

Send the package to production administrators.

Answer Area

Select the canvas app in the Maker portal.

Export the package.

Send the package to production administrators.

NEW QUESTION 4

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories. You are creating an app to manage requests for new products. The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings. Only two new tables should be created in Microsoft Dataverse: ? Products: Holds the products that can be requested. ? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category. You need to identify the data types to use when building the table columns in Dataverse. Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Data types

Lookup

Choice

Text

Answer Area

Scenario

Create a column in the Products table that displays the category of the product

Create a column in the Products table for the product ID of the product

Create a column in the Requests table that allows the user to select form a list of available products

Data types

Data type

Data type

Data type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text  
Text columns can contain text characters. This column type has several format options that will change the presentation of the text.  
Box 2: Lookup  
When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.  
Box 3: Choice  
You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

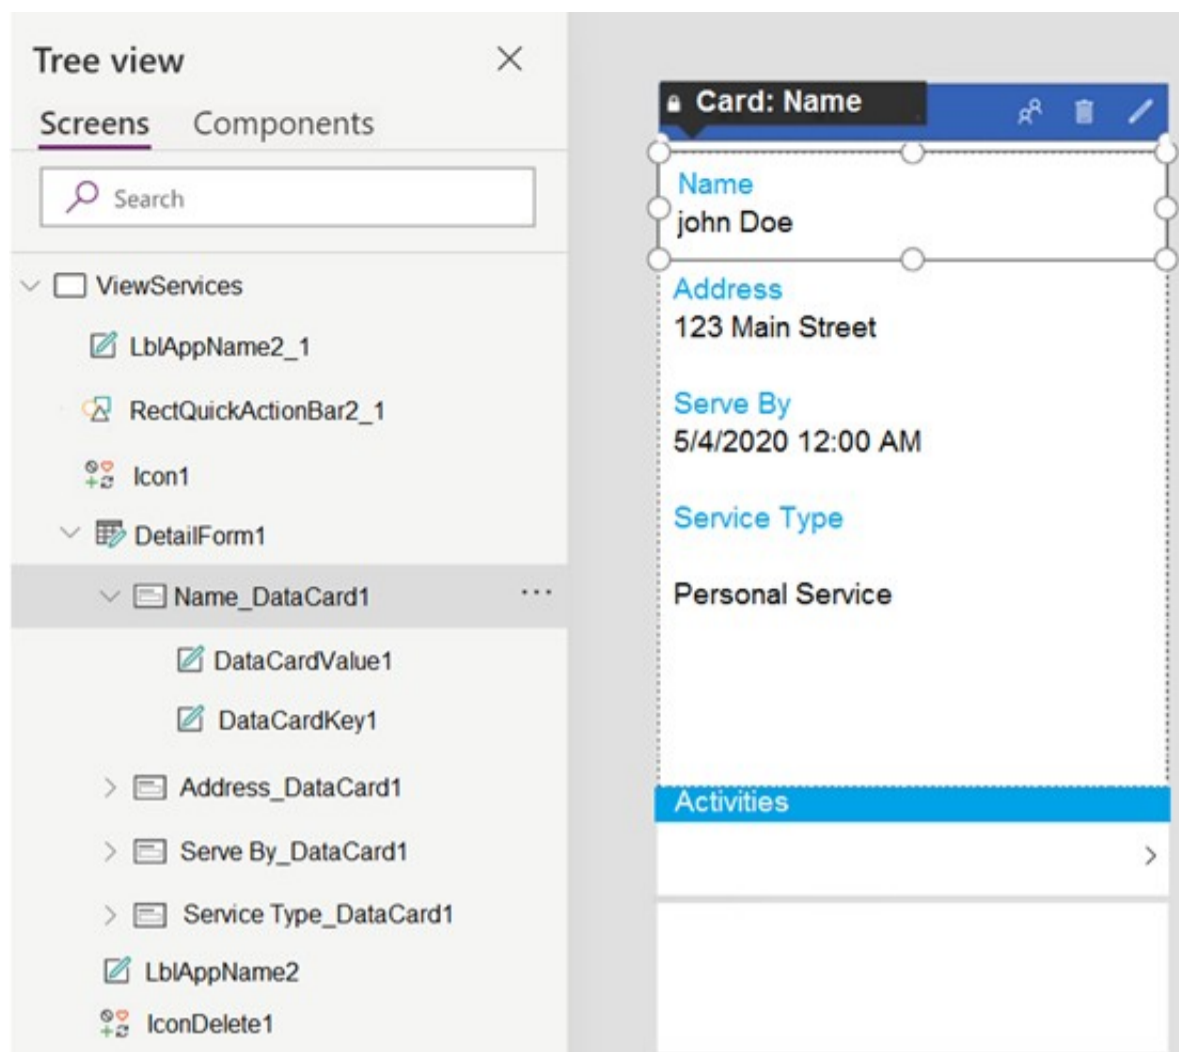

NEW QUESTION 5

HOTSPOT - (Topic 4)

You create a canvas app for a service company. Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

Passing Certification Exams Made Easy

visit - https://www.2PassEasy.com

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

▼

Name\_DataCard1.Default

Name\_DataCardKey1.Default

Name\_DataCardValue1.Default

Which action should you perform on the People icon?

▼

In the On Select property, set the Activity form to Edit mode.

In the On Select property, set the Activity form to View mode.

Move the icon to the Activity form and set the On Select property to the Activity screen.

Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Name\_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

## NEW QUESTION 6

- (Topic 4)

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named Gallery\_Accounts to the screen. You set the data source of Gallery\_Accounts to Accounts and add another blank screen named Screen\_AccountDetail.

You need to complete the app.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to Vie
- B. Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).Set the data source of the form to Account
- C. Set the Item property of the form to Selected.Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).
- D. Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to Vie
- E. Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).Set the data source of the form to Accounts.Set the Item property of the form to First(Accounts).Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).
- F. Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to Ne
- G. Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).Set the data source of the form to Account
- H. Set the Item property of the form to Selected.Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

- I. Add a display form to Screen\_AccountDetail.Set the data source of the form to Account
- J. Set the Item property of the form to Selected.Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

Answer: AD

Explanation:

Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 7

- (Topic 4)  
You are an app designer for a hotel.  
The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.  
Where should you create the environment?

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. Dynamics 365 Admin center

Answer: A

Explanation:

Manage environment in the Power Platform admin center. Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/create-environment>

NEW QUESTION 8

DRAG DROP - (Topic 4)  
A company has the following divisions: wholesale and retail.  
The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.  
You need to ensure that each user sees data only for the team to which the user is assigned.  
How should you secure the report?  
To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

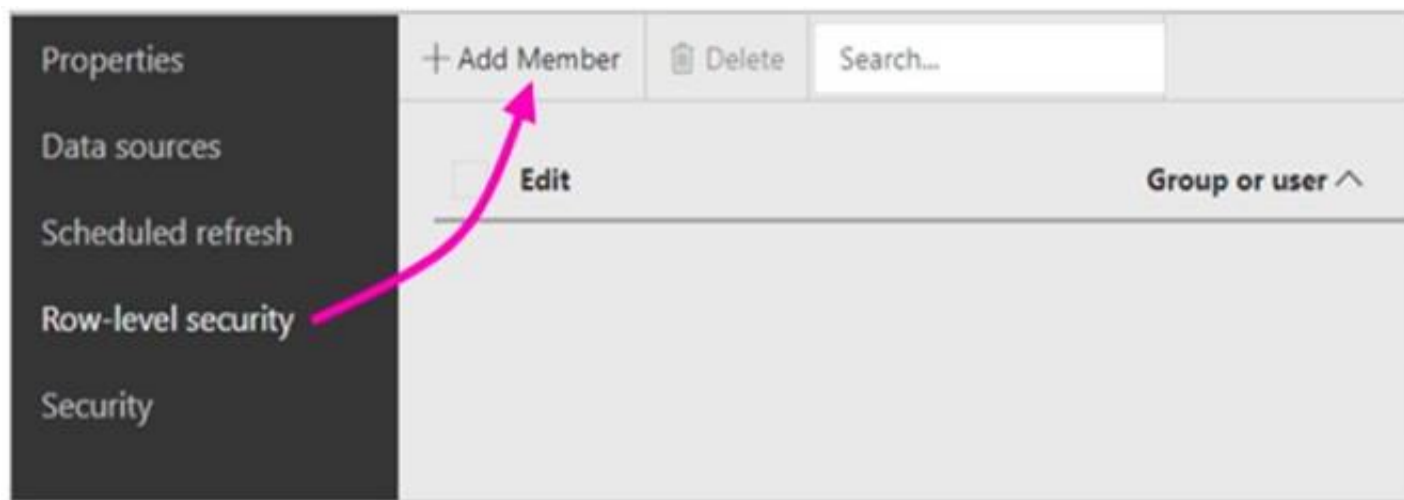

Options	Answer Area	
	Action	Option
Power BI Service	Create the team as a role.	Option
Power BI Desktop	Add members to the role.	Option
Common Data Service		
Power Platform Admin center		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power BI Desktop  
You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.  
To define security roles, follow these steps.  
? Import data into your Power BI Desktop report, or configure a DirectQuery connection.  
?F rom the Modeling tab, select Manage Roles.  
? From the Manage roles window, select Create.  
? Etc.  
Box 2: Power BI Service  
After you save your report in Power BI Report Server, you manage security and add or remove members on the server.  
\* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.  
\* 2. In Power BI Report Service, select the ellipsis (...) next to the report.  
\* 3. Select Manage > Row-level security.

On the Row-level security page, you add members to a role you created in Power BI Desktop.

#### NEW QUESTION 9

- (Topic 4)

You create a canvas app for technicians at a computer store. You assign technicians cases to work on. The technicians update cases at the end of customer site visit.

The manager wants the technicians to sell warranties to the customers. If a customer agrees to purchase a warranty, technicians use the canvas app to immediately alert the sales team, and then the technician records details about the warranty into the app.

You need to create a flow to alert the sales team. Which type of trigger should you use?

- A. Flow button for mobile
- B. Office 365 Outlook
- C. Common Data Service

**Answer:** A

#### Explanation:

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

Note: There are many repetitive tasks that we all wish we could run with just a tap of a button. For example, you may need to quickly email your team to remind them to join the daily team sync, or you may want to start a new Visual Studio Codespaces build of your code base after you've been notified that there are no more checkins planned for the day. Button flows allow you to accomplish these and many other tasks simply by tapping a button on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens>

#### NEW QUESTION 10

- (Topic 4)

A company uses Power Apps in a single Microsoft Dataverse environment.

Users are divided into two groups about not a canvas app should work. The company decides that each group of users will try a version of the app for one week and switch to the other version of the app the following week.

You need to manage the app creation. What should you do?

- A. Create one app with two different version numbers.
- B. Create one app with two different version notes.
- C. Create two apps with the same name.
- D. Create two apps with different app names.

**Answer:** A

#### NEW QUESTION 10

- (Topic 4)

A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.

The Power Platform solution needs to use data from the product information system. You need to transform and import the data from the product information system. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business process flow
- C. Power BI Desktop
- D. Data gateway

**Answer:** AD

#### Explanation:

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services. Can use the Power Platform dataflows to load entity in CDS with the option to transform data.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-onprem> <https://nishantrana.me/2020/07/07/load-data-from-sql-on-premise-to-cds-common-data-service-using-powerplatform-dataflows-in-power-apps/>

#### NEW QUESTION 15

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint. You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source. You need to shore the app with the users. What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

<b>Actions</b>	<b>Answer Area</b>	<b>Component</b>	<b>Action</b>
Send all users an email invitation.		Canvas app	
Enable Can use permission.		SharePoint connection	
Set the users as co-owners.			
Enable Can edit permission.			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<b>Actions</b>	<b>Answer Area</b>	<b>Component</b>	<b>Action</b>
Send all users an email invitation.		Canvas app	Send all users an email invitation.
Enable Can use permission.		SharePoint connection	Enable Can use permission.
Set the users as co-owners.			
Enable Can edit permission.			

NEW QUESTION 16

DRAG DROP - (Topic 4)  
DRAG DROP

A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file. You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

<b>Actions</b>	<b>Answer Area</b>
Select manual data.	
Log into the Power BI service.	
Install Power BI Desktop and log in.	
Select <b>Create</b> .	
Select <b>Use first row as headers</b> .	
Paste the data.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<b>Actions</b>	<b>Answer Area</b>
Select manual data.	
Log into the Power BI service.	Log into the Power BI service.
Install Power BI Desktop and log in.	Install Power BI Desktop and log in.
Select <b>Create</b> .	Select <b>Create</b> .
Select <b>Use first row as headers</b> .	Select <b>Use first row as headers</b> .
Paste the data.	Paste the data.

NEW QUESTION 17

DRAG DROP - (Topic 4)  
You are designing a data model for a new app. The app will be supported by two tables. TableA will contain data that is unique to your industry. TableB will provide access to readonly data from an Azure SQL database. You need to configure the tables. Which table type should you use? To answer, drag the appropriate table types to the correct tables. Each table type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

<b>Table types</b>	<b>Answer Area</b>	<b>Table</b>	<b>Table type</b>

NEW QUESTION 23

- (Topic 3)

You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

- A. Gallery
- B. Combo box
- C. Custom component

D. Choices

Answer: D

NEW QUESTION 27

DRAG DROP - (Topic 3)

You need to select a design approach for the required features.

Which app type should you use? To answer, drag the appropriate app types to the correct requirements. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 32

HOTSPOT - (Topic 2)

You need to configure the system to meet the sales requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Ensure that work estimates are complete before entering estimated sales values into the Sales Log.	<div><div></div><div>Use a Business Process flow</div><div>Use a UI flow</div></div>
Prevent modification of timesheet entries by an employee.	<div><div></div><div>Add a custom control to the Business Process flow</div><div>Use a formula to set the DisplayMode property</div><div>Use a business rule</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Use a Business Process flow

Scenario: The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.

Box 2: Use a formula to set the DisplayMode property

DisplayMode - The mode to use for data cards and controls within the form control. Derived from the Mode property based and cannot be set independently:

Mode	DisplayMode	Description
FormMode.Edit	DisplayMode.Edit	Data cards and controls are editable, ready to accept changes to a record.
FormMode.New	DisplayMode.Edit	Data cards and controls are editable, ready to accept a new record.
FormMode.View	DisplayMode.View	Data cards and controls are not editable and optimized for viewing.

NEW QUESTION 33

- (Topic 1)

You need to provide all app components of the application to Tailwind Traders. What should you do?

- A. Package the application and flow components into a single solution for export.
- B. Run the app checker and flow checker prior to publishing each component for export.

- C. Export each component separately but use the same version number for each component.
- D. Publish the application and flow solutions at the same time before exporting each one.

Answer: B

Explanation:

Scenario: When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.

Power Apps has added components to the rule set that encourages best practices in the Power Apps Checker. You can check your canvas apps and flows that are included in solutions and then review all issues in a single, consolidated report.

Reference:  
https://docs.microsoft.com/en-us/power-platform-release-plan/2019wave2/microsoft-powerapps/checker-includes-rules-canvas-apps-flows

NEW QUESTION 38

HOTSPOT - (Topic 1)

You need to roll back the mobile app to an earlier version.

Requirement	Action
Identify the currently published version and view version notes.	<div><div></div><div>View the session details page for the app in Power Apps Studio. View environment details for the app in the Power Admin portal. View details for the app in the Power Apps Maker portal.</div></div>
Revert to an earlier version of the app.	<div><div></div><div>Select Restore on the previous version of the app. Export the previous version of the app and import as a new version. Delete versions of the app until the desired version is the most recent.</div></div>

What should you do? To answer, select the

appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Identify the currently published version and view version notes.	<div><div></div><div>View the session details page for the app in Power Apps Studio. View environment details for the app in the Power Admin portal. View details for the app in the Power Apps Maker portal.</div></div>
Revert to an earlier version of the app.	<div><div></div><div>Select Restore on the previous version of the app. Export the previous version of the app and import as a new version. Delete versions of the app until the desired version is the most recent.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: View the sessions details page for the app in Power Apps Studio

Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

NEW QUESTION 41

DRAG DROP - (Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Requirement	Tool
<input type="text" value="Solution Checker"/>	Accessibility	<input type="text" value="Tool"/>
<input type="text" value="App Checker"/>		
<input type="text" value="Object Detector"/>	Deployment	<input type="text" value="Tool"/>
<input type="text" value="Preview the app"/>		

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse. Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines. Use solution checker to validate your model-driven apps in Power Apps.

**NEW QUESTION 45**

- (Topic 4)

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.

A Power Automate flow monitors social media channels to identify high-impact trends. When the Power Automate flow identifies the trends, consistently formatted and standardized feedback must be collected from the channel members within Teams.

You need to streamline the Power Automate and Teams communication process.

What should you use?

- A. AI Builder  
B. Common Data Service business process flows  
C. Adaptive cards  
D. Integrated approval flows

Answer: A

**Explanation:**

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery."

Jim Parker: Web and Collaboration Services Manager

Reference:

<https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform>

**NEW QUESTION 49**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named and add another blank screen named Screen\_AccountDetail.

You need to complete the app. Solution:

? Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to View.

? Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).

? Set the data source of the form to Accounts.

? Set the Item property of the form to Selected.

? Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

Does the solution meet the goal?

- A. Yes  
B. No

Answer: A

**Explanation:**

View, edit, or create an item, save the contents, and reset the controls in an Edit form control.

FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.

This function is often invoked from the OnSelect formula of a Button or Image control.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

**NEW QUESTION 51**

DRAG DROP - (Topic 4)  
You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app. Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
Business rule	Guide a user through the set of steps needed for onboarding a new employee.	
Power Automate	Make date of birth mandatory when creating a new employee record.	
Business process flow	Implement an approval flow for expense reports submitted by employees.	

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: Business process flow  
A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.  
Box 2: Business rule Box 3: Power Automate  
A Power Automate flow does not have any visual components like a business process flow.  
Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

NEW QUESTION 55

- (Topic 4)  
A company uses Microsoft Power Platform. You create a solution with components You deploy the solution in the production environment Users report issues with a process. You open the last imported solution. You need to troubleshoot the issue. What should you view?  
A. Solution dependencies  
B. Solution classic view  
C. History

Answer: D

NEW QUESTION 57

HOTSPOT - (Topic 4)  
A coworker creates a canvas app. The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1
},
{
    Tool: "Screwdriver",
    Quantity: 2
})
```

You are updating the canvas app.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	<input type="radio"/>	<input type="radio"/>
A local collection is created to store data if a data source named Toolbox does not already exist.	<input type="radio"/>	<input type="radio"/>
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No  
Records are added, not updated.  
Box 2: Yes  
The Collect function adds records to a data source. Syntax: Collect( DataSource, Item, ... )  
DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.  
Item(s) - Required. One or more records or tables to add to the data source.  
Box 3: No  
No records are cleared.

NEW QUESTION 62

DRAG DROP - (Topic 4)  
A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database. You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration. Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

NEW QUESTION 66

- (Topic 4)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
 You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.  
 Development and testing must be performed using production data. Multiple testers must be used at each testing stage.  
 You need to provision and configure new environments for development and testing. Solution:  
 ? Provision a developer environment named D1 and a sandbox environment named S1.  
 ? Copy the production environment to both D1 and S1.  
 ? Use D1 for development and S1 for testing.  
 Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Production: This is intended to be used for permanent work in an organization. Do not use production environment for testing.  
 Note: Instead use two sandboxed environments: one for development and one for testing.  
 Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

**NEW QUESTION 67**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
 You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.  
 Development and testing must be performed using production data. Multiple testers must be used at each testing stage.  
 You need to provision and configure new environments for development and testing. Solution:  
 ? Provision sandbox environments named S1 and S2.  
 ? Copy the production environment to both S1 and S2.  
 ? Use S1 for development and S2 for testing.  
 Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.  
 Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

**NEW QUESTION 68**

HOTSPOT - (Topic 4)

You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store.  
 The company has strict rules about access, permissions, and privacy.  
 Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.  
 You need to ensure that these rules are observed consistently and managed in one place.  
 Which type of app should you create? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	App type
Access client billing details	<div> <div></div> <div>                     Canvas app in Microsoft Teams                      Canvas app in SharePoint                      Model-driven app in SharePoint                      Model-driven app in Microsoft Teams                 </div> </div>
Log phone calls and schedule appointments with clients and the team assigned to them	<div> <div></div> <div>                     Dynamics 365 App for Outlook                      Microsoft Teams calendar                      SharePoint calendar                 </div> </div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Model-driven app in Microsoft Teams  
 A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is done via Dataverse security roles.  
 Box 2: Sharepoint Calendar

#### NEW QUESTION 71

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

#### Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

#### NEW QUESTION 72

- (Topic 4)

In a Common Data Service database, you create a canvas app and a custom entity. The

app also reads data from the Account entity in the Common Data Service database.

Entity access permissions will be controlled by the Common Data Service User security role. You create a Common Data Service solution.

You need to replicate the changes to a new Common Data Service database.

Which two components should you include with the canvas app? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Custom entity

B. Account entity

C. Common Data Service User security role

D. Sitemap

**Answer: BC**

#### NEW QUESTION 75

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<div>On the header control.</div> <div>On each RiskStatus slider input.</div> <div>In the global variables of the Power Apps app.</div> <div>On the OnStart property of the Power Apps app.</div>
Which formula should you use?	<div>SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&gt;=150? "HIGH RISK" : " "</div> <div>IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&lt;150, " ", HIGH RISK")</div> <div>Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatus3.value)&gt;=150, "HIGH RISK")</div> <div>UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value&gt;=150), "HIGH RISK")</div>

- A. Mastered  
 B. Not Mastered

Answer: A

**Explanation:**

Box 1: On each RiskStatus slider input  
 You can change the value based on input.  
 Box 2: Updateif(..)

Use the Updateif function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.

**NEW QUESTION 76**

DRAG DROP - (Topic 4)

You are creating entities in a Common Data Service database to capture sales data. You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.

You need to configure the fields for the entities.

Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Field types	Answer Area	
	Field name	Field type
Rollup	GrossAmount	Field type
Calculated	DiscountAmount	Field type
Simple	TotalSales	Field type

- A. Mastered  
 B. Not Mastered

Answer: A

**Explanation:**

Box 1: Calculated

Calculated columns are calculated in real-time when they are retrieved. Calculated columns can be composed using different data types. For example, an Integer calculated column may reference values from Decimal or Currency columns.

Box 2: Simple

A simple column isn't defined as a calculated or rollup column.

Box 3: Rollup

Because rollup columns persist in the database, they can be used for filtering or sorting just like regular columns.

**NEW QUESTION 77**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution:

Create a custom rollup field of type currency on the country/region table that aggregates all the total amounts for the orders from that country/region and display this rollup field in a Power BI chart.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

**NEW QUESTION 82**

- (Topic 4)

You are creating a canvas app for a company that delivers packages. The app will display one screen for each delivery attempt.

Drivers must make three attempts to deliver a package before returning the package back to a warehouse. Drivers must enter details about delivery on a second screen in the app.

You need to display a list of delivery attempts on the delivery screen.

Which two components can you add to the app to display details about the delivery attempts? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Data table

B. Vertical gallery

C. Display form

D. Drop-down

**Answer: AC**

**Explanation:**

The Data table control shows a dataset.

In a canvas app, add and configure a Display form control to show all fields in a record. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-data-table> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-form-layout>

**NEW QUESTION 83**

- (Topic 4)

You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

A. Custom connector

B. Connection

C. Microsoft Dataverse customization

D. Power Automate cloud flow

**Answer: D**

**NEW QUESTION 87**

- (Topic 4)

You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.

After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.

You need to determine why the background color changed.

What are two possible causes for the background color change? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. You recently changed the Office 365 theme.

B. You exported a managed copy of the solution and imported the solution as an unmanaged solution.

C. You modified the canvas app in the unmanaged solution.

D. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.

E. You chose a different theme from the Theme menu inside the canvas app.

**Answer: AC**

**Explanation:**

A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized

system.  
C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.  
Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.  
Reference:  
<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>  
<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-themes-organization-branding>

NEW QUESTION 92

- (Topic 4)  
A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. SQL Server Management Studio
- D. Visual Studio Code

Answer: BC

Explanation:

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to- one) relationships:  
? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal  
? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n- relationships>

NEW QUESTION 95

HOTSPOT - (Topic 4)  
HOTSPOT  
Users in your company vote on color choices for marketing materials by using the following canvas app:

Enter new color:

Marine blue

Add color

Color Options

☐ Sky blue

☒ Dark blue

☐ Marine blue

Clear Selection

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection  
You need to implement the functionality.  
Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Action	Power Fx formula
User selects <b>Add color</b> .	If(txtColor.Value <> "", Collect(ColorList, txtColor.Value))
	If(txtColor.Value <> "", Collect(ColorList, txtColor.Value))
	If(Value(txtColor.Text) <> "", Collect(ColorList, txtColor.Text))
	If(Value(txtColor.Color) <> "", Collect(ColorList, txtColor.Color))
User selects <b>Clear Selection</b> .	Revert(radioselector); ClearCollect(ColorList, txtColor.Value)
	Reset(radioselector); Clear(ColorList)
	Reset(radioselector); Refresh(ColorList)
	Revert(radioselector); Remove(ColorList)
	Revert(radioselector); ClearCollect(ColorList, txtColor.Value)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Power Fx formula
User selects <b>Add color</b> .	<div><div>If(txtColor.Value &lt;&gt; "", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value &lt;&gt; "", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) &lt;&gt; "", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) &lt;&gt; "", Collect(ColorList, txtColor.Color))</div></div>
User selects <b>Clear Selection</b> .	<div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div><div>Reset(radioselector); Clear(ColorList)</div><div>Reset(radioselector); Refresh(ColorList)</div><div>Revert(radioselector); Remove(ColorList)</div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div></div>

NEW QUESTION 100

- (Topic 4)

You are creating an app for a company. You need to evaluate the default solution.  
Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. You can change the prefix of the publisher of the default solution
- B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in the publisher in the publisher
- C. You can change the version number of the default solution

Answer: AC

Explanation:

https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1

NEW QUESTION 103

DRAG DROP - (Topic 4)

DRAG DROP

A company is migrating to a new Microsoft 365 tenant. You create an expense  
You need to move the latest version of the canvas app and cloud flow to the new tenant. Which three actions should you perform in sequence? To answer, move the appropriate  
actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Import the app.	
Publish all changes.	
Create a copy of the app in the cloud.	
Export the app as a package.	
Share the app with a user in the new tenant.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
Import the app.	
Publish all changes.	
Create a copy of the app in the cloud.	
Export the app as a package.	
Share the app with a user in the new tenant.	

NEW QUESTION 105

- (Topic 4)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.  
Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b\_accountid

Answer: D

Explanation:

Which fields can be secured?  
Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.  
ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage\_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode  
Reference:  
https://docs.microsoft.com/en-us/power-platform/admin/field-level-security

NEW QUESTION 110

- (Topic 4)  
A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees. You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data. You need to connect the chatbot to the Dataverse table. What should you use?

- A. Table
- B. Power Apps
- C. Microsoft Teams
- D. Power Virtual Agents
- E. Power Automate

Answer: C

**Explanation:**  
Dataverse for Teams is the “lite” version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.  
Reference:  
https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/  
https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-action-pull-data

NEW QUESTION 113

HOTSPOT - (Topic 4)  
Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol. The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal’s habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available. You need to design the app. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Enter notes related to wildlife records.	<div>▼</div> <div>Enable the Wildlife entity and annotation entity for mobile offline. Enable the attachments entity and the annotation entity for mobile offline. Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity. Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.</div>
Enter wildlife details as related records.	<div>▼</div> <div>Allow feedback on the Wildlife Details entity. Enable the Wildlife Details entity for mobile offline. Enable change tracking on the Wildlife Details entity. Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.</div>
Indicate that an animal requires medical attention.	<div>▼</div> <div>Create a business rule. Create a business process. Create a Power Automate flow.</div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: Enable the Wildlife entity and the annotation entity for mobile offline  
Note: As part of the 2020 Wave 2 release, we made generally available offline capabilities for model driven apps for users of Power Apps. Makers and administrators can now configure apps to be available offline on a user’s device, and users can continue to complete their tasks against the local cache on their phone even with intermittent or no network connectivity. When the network is re-established, the users’ changes are seamlessly synchronized back to the cloud.  
Box 2: Enable attachments on the Wildlife Details entity and enable Wildlife Details entity for mobile offline.  
Box 3: Create a business process.  
Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.  
Note: Power Automate includes several types of processes, each designed for a different purpose:  
? Automated flows. Create a flow that performs one or more tasks automatically  
? Button flows.  
? Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.  
? Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.  
? Workflows and actions. Dynamics 365 customizers may be familiar with the classic Microsoft Dataverse processes, which are workflows and actions.

NEW QUESTION 118

- (Topic 4)  
You work in a warehouse. You build an app for physical inventory counts that is used by different staff members. The typical count takes 14 hours.

The app has a warehouse screen with a gallery that contains the aisles in the warehouse. When a staff member selects an aisle record, another screen displays all the items stored in that aisle. The staff must know how long each aisle takes to do a physical inventory count. You need to add logic to the app. What should you do?

- A. Configure a timer control, add it to the aisle screen, and then reset it when exiting the aisle screen
- B. Create and configure a stopwatch custom control, and then add it to the gallery
- C. Create and configure a stopwatch custom component, and then add it to the aisle screen
- D. Configure a timer control, add it to the gallery, and then reset it when the selection changes

**Answer: C**

**Explanation:**

Reference:

<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

#### NEW QUESTION 122

- (Topic 4)

A company creates multiple cases in Microsoft Dataverse each day with a status of New.

For all cases with a status of New, the system must send an email to the customer and then change the status to in Process.

You need to create a Microsoft Power Automate cloud flow to automatically send the email. What should you do?

- A. Trigger the flow on a schedule and then configure the flow to use the Compose data operation to get a list of cases and send email to each from inside a loop.
- B. Trigger the flow on a schedule and then configure the flow to use the Dataverse Listrows action to query case records using a filter and send email to each from inside a loop.
- C. Trigger the flow manually on the case and then configure the flow to send the email.

**Answer: B**

#### NEW QUESTION 123

HOTSPOT - (Topic 4)

A state planning department stores demographic data in a local SQL Server database.

The department uses a local report server to analyze the data for land development purposes.

You need to create a visual to display the demographic data.

Which component should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Visual control.	Filled map Filled map Shape map ArcGIS map

#### NEW QUESTION 125

- (Topic 4)

A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.

Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Ask the coworker to assign you to the owner role for the team.
- B. In Advanced tools, select Monitor.
- C. Ask the coworker to add you to their team.
- D. Select the chatbot and then select the Share button.

Answer: AB

#### NEW QUESTION 129

DRAG DROP - (Topic 4)

A company uses Power Apps. You design the interface for a new model-driven app.

Users must interact with data from records related to the primary record form in the following ways:

- Use related business process flows.
- Display primary and related form columns.

You need to configure the forms without using additional customizations.

Which form types should you use? To answer, drag the appropriate form types to the correct requirements. Each form type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

Form types		Requirement	Form type
Quick view form		Use related business process flows.	
Main form dialog		Display related columns along with other primary form columns.	
Quick create form			
Main form component control			

- A. Mastered  
 B. Not Mastered

Answer: A

#### Explanation:

Form types		Requirement	Form type
Quick view form		Use related business process flows.	Main form component control
Main form dialog		Display related columns along with other primary form columns.	Quick view form
Quick create form			
Main form component control			

#### NEW QUESTION 131

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes  
 B. No

Answer: A

#### Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps>

#### NEW QUESTION 134

- (Topic 4)

You create a personal view.

You need to ensure that other users can access the view. What should you do?

- A. Email the users a link to the view.  
 B. Set the view as the default view.  
 C. Share the view with the users.  
 D. Assign the view to the users.

Answer: C

#### NEW QUESTION 139

- (Topic 4)

You are creating an employee directory canvas app. The app must display name, address, and a photo of each employee. You need to select a control type that will display the

- A. Address input  
 B. List box  
 C. Gallery

D. Data table

Answer: C

#### NEW QUESTION 140

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.

For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Question	Response
Where do you enter the formula to change the button color?	<div> <div></div> <div> On the RiskStatus slider.  On the RiskLevel button.  In the variables of the Power Apps app.  On the OnStart property of the Power Apps app. </div> </div>
Which formula should you use?	<div> <div></div> <div> If (RiskStatus.Value &gt; 75) (return Red;)  If (RiskStatus.Value &gt; 75, Red, Green)  If (RiskStatus.Value &gt; 75 ? Red : Green)  RiskLevel.Fill = RiskStatus.Value &gt; 75 ? Red : Green; </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Box 1: On the RiskLevel button.

On the RiskLevel button fill property.

Box 2: Risklevel.Fill = RiskStatus.Value > 75 ? Red : Green;

Most every type of control in a Power App, has a Fill property, for the fill color.

#### NEW QUESTION 145

- (Topic 4)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing.

The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations.

You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports
- B. Microsoft Compliance Center
- C. Power Apps Studio
- D. Microsoft Accessibility Guides
- E. Microsoft Visual Studio

Answer: C

#### Explanation:

? Find accessibility issues

? In the upper-right corner of Power Apps Studio, select the icon for the App checker.

? App checker icon.

? In the menu that appears, select Accessibility.

? A list of issues appears, sorted first by severity and then by screen.

? Select the arrow next to an item to show details about it.

? Accessibility checker details.

? Select the back arrow to return to the list of items.

? If you decide to address an issue, select it to open the affected property.

? After you change one or more properties, select Re-check to update the list of issues.

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://support.microsoft.com/en-us/accessibility/enterprise-answer-desk>

NEW QUESTION 148

- (Topic 4)

A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

- A. Flow button for mobile
- B. Power Apps step with trigger conditions
- C. New Microsoft Outlook task
- D. Condition step

Answer: A

NEW QUESTION 153

HOTSPOT - (Topic 4)

You use Microsoft Power BI Desktop to create a report. Users note that column headings are confusing. You need to modify some columns and delete other columns.

Which tool should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Modification	Tool
Rename a column	<div>Power Query Editor</div> <div>Report canvas</div> <div>Filters pane</div> <div>Power Query Editor</div>
Delete a column	<div>Fields pane</div> <div>Report canvas</div> <div>Fields pane</div> <div>Filters pane</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Modification	Tool
Rename a column	<div>Power Query Editor</div> <div>Report canvas</div> <div>Filters pane</div> <div>Power Query Editor</div>
Delete a column	<div>Fields pane</div> <div>Report canvas</div> <div>Fields pane</div> <div>Filters pane</div>

NEW QUESTION 154

- (Topic 4)

A company is implementing the Microsoft Power Platform to assist with consolidation of onsite inspections and audits of retail stores. Currently, the data used by the retail store inspections is located across multiple systems.

The canvas app must use one database to view and record all data used in the inspection process.

You need to design the solution.

Which three capabilities should you implement? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Use an embedded access management framework for user security.
- B. Execute real-time data operations against external data sources through virtual entities.
- C. Store data used by a Power Apps app on both iOS and Android mobile platforms.
- D. Use Azure Data Lake storage to host the transactional data.

Answer: BCE

Explanation:

B: Virtual tables (also known as virtual entities) enable the integration of data residing in external systems by seamlessly representing that data as tables in Microsoft Dataverse, without replication of data and often without custom coding.

CE: Authenticating to a Gen 1 DataLakeStore Account Gen 1 uses OAuth 2.0 in Azure AD for authentication.

NEW QUESTION 156

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create a Category Classification custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

#### NEW QUESTION 161

DRAG DROP - (Topic 4)

You are an app maker for a college. You create an app for student enrollment. The app captures the education level of the applicants.

The education level at the time of enrollment is an option set in the student entity. The

? High school

? College

? Bachelor

You must split the College option into two option sets:

? College – 1 Year

? College – 2 years

The split must not impact existing data. You need to create the two option sets.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Open the maker app and navigate to the student table		
Publish the student entity		
Save the student table	➤	⬆
Open settings in the Power Platform admin center	⬅	⬇
Create new options for College - 1 Year and College - 2 years		

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

Actions		Answer Area
Open the maker app and navigate to the student table		Open the maker app and navigate to the student table
Publish the student entity		
Save the student table	➤	Create new options for College - 1 Year and College - 2 years
Open settings in the Power Platform admin center	⬅	Publish the student entity
Create new options for College - 1 Year and College - 2 years		

#### NEW QUESTION 166

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named Gallery\_Accounts to the screen. You set the data source of Gallery\_Accounts to Accounts and add another blank screen named Screen\_AccountDetail.

You need to complete the app.

Solution:

- ? Add a display form to Screen\_AccountDetail.
  - ? Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).
  - ? Set the data source of the form to Accounts.
  - ? Set the Item property of the form to Selected.
  - ? Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).
- Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

**NEW QUESTION 168**

DRAG DROP - (Topic 4)

You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina.

You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members.

You need to embed the list of boats associated with a Marina record in the entity form.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

- Add a Subgrid component to a form
- Select **Show related records** and then select the related entity and default view for the subgrid
- Save and publish the form
- Select the **Allow users to change view** option

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Add a Subgrid component to a form

You add a subgrid component the same way as you add any other component.

Step 2: Select Show related records and then select the related entity and default view for the subgrid

Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

? Show related rows

When selected, the subgrid displays only rows related to the current row that is displayed on the form.

Step 3: Select the Allow users to change view option Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

? Allow users to change view

When selected, app users can change from the Default view to another view of the table

selected in the Table property. Step 4: Save and publish the form

**NEW QUESTION 173**

DRAG DROP - (Topic 4)

You create a canvas app. You run App checker to validate the app. App checker returns error results.

You need to locate where the errors occur.

Which areas should you review? To answer drag the appropriate areas to the correct error messages. Each area may be used once, more than once, or not at all

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 178

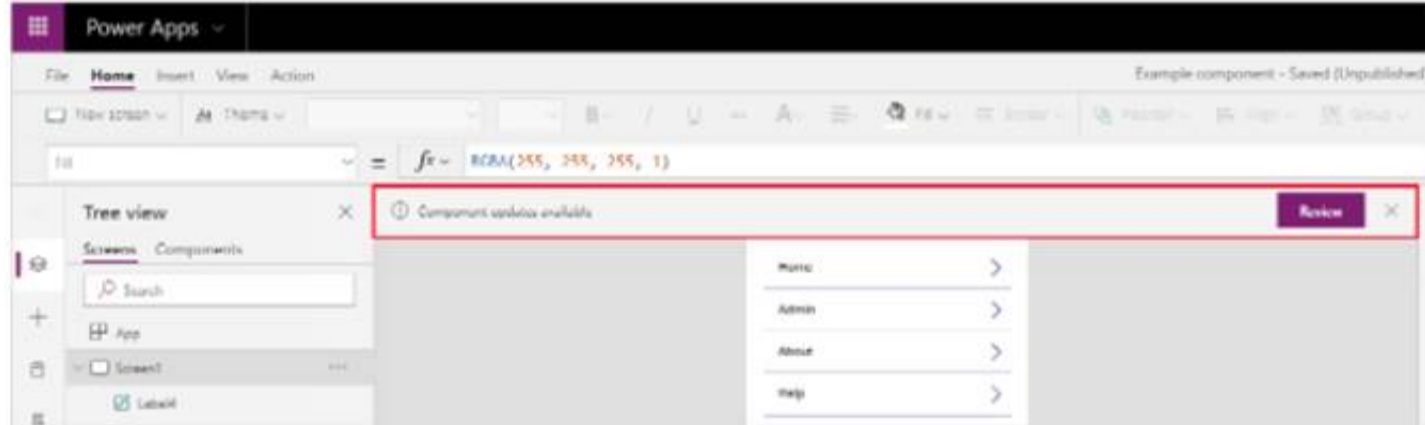

- (Topic 4)  
You create and publish a canvas app component library to perform complex calculations.  
You discover an error in one of the calculations. You correct the issue and publish the canvas app.  
You need to ensure that the co-worker uses the updated version of the component library.  
What should you do?

- A. Export the updated component library and instruct the co-worker to import the updated version into the canvas app
- B. Inform the co-worker to edit the canvas app and manually add the updated version of the component library
- C. Instruct the co-worker to edit the canvas app and update the component library

Answer: C

Explanation:

You can modify an existing component library and save any changes with additional version notes. However, the updated component library version must be published for use in existing apps that use the component library.  
Makers of other apps are notified of updated components being available. The notification appears when makers edit the apps in canvas app studio. They can choose to update the components:

Select Review, and you'll see the option to update the component:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>
